

Installation and Set-Up Guide Cimballi S15 Milk PS w/ Milk Cooler

(208 - 240 V 60 HZ > Single Phase)

* Please note - Cimballi USA suggest a "shut-off" or "gate valve" under the espresso machine, so that any works requiring to be completed on your espresso machine does not interfere with other water outlets in your venue. The venue is required to ensure that all local, and state health and safety codes are met prior to installation. All espresso equipment is NSF and UL code certified
