

TREE STRAP CARABINER KIT

- Easily adjustable 10 ft. strap length anchors to any identifiably safe tree, beam or play structure
- Hang any swing safely while protecting your tree – wide strap minimizes damage to trees and is safer, stronger, and easier to use than rope
- Tree strap made of 1-7/8" non-stretch polyester 5-panel 100% polyester webbing – resistant to abrasion, water, and contains UV inhibitors that prevent sunlight decay
- Loop ends are securely doubled over for more durable connection points with swing hardware
- Box-X pattern sewn into strap to ensure uniform stitch length and strength

SAFETY RATED

CONTENTS

- (1) 10 ft. (120 in.) strap
- (1) Safety Screw-Locking Straight Gate Stainless Steel Carabiner

INSTALLATION INSTRUCTIONS

1. Find your spot. Locate beam, playground, or healthy horizontal tree branch (branch should be a minimum 8" in diameter). Area surrounding hanging site should be clear of obstacles and over flat, soft terrain.
2. Wrap tree strap around healthy sturdy branch or other object and pass one loop through the other. The excess strap should hang from the underside of the branch. (A)

3. To adjust height of strap continue to wrap strap around tree branch and through the loop multiple times until desired length is achieved (B) or create loop with center of strap and pull both ends through (C).
4. Pull strap tightly to secure against branch.
5. Attach your swing securely to the hanging loop(s) using optional carabiner or by attaching swing hanging hardware directly to the loop.

IMPORTANT:

- Check your strap frequently for signs of wear. If any part of the kit is worn down, do not use.
- Tree strap safely supports maximum weight of 800 lbs.
