SHOP RATE - \$80/HR

Minimum shop charge \$15.00

Shop supplies, parts, and components are not included in pricing

Pricing is subject to change without notice. Rates may change when applied to road, e-bikes and other specialty models.

SERVICE POLICY

Due to the complexity of some e-bike repairs, standard rates and fees may not apply to all procedures (e.g., cable installations that require the motor to be removed for accessibility). All applicable bikes must include a copy of the battery key when left for service; many models of e-bikes require the removal of the battery for safe access to electrical, mechanical, and hydraulic systems. All bikes must be submitted with a completed Shop Service form.
