Demodulation Analysis

## Product Overview

S1220 ASK-FSK Demodulation Analysis is used to work with **RIGOL** DSA875/TG, DSA832/TG, and DSA832E/TG spectrum analyzer to realize demodulation and analysis for the modulated ASK and FSK signals.

## Product Features

- Highlight the reference symbols
- Support Manchester Encoding
- Display the waveform, eye diagram, symbol, and demodulation results in one interface
- Set the reference position of the waveform and eye diagram as required
- Provide single/continuous sweep modes, enabling you to observe the demodulation results at any time point
- Load the saved configuration data and improve efficiency
- Provide demos for you to enjoy great user experience with the software, without connecting the instrument or obtaining a license
