### Material Classification

Earthquip Holdings Ltd classifies loads according to material type, compatibility and moisture content. Classification is at the sole discretion of Earthquip Holdings Ltd Staff and Earthquip Holdings Ltd has the right to re classify any material or reject any material for any reason whatsoever.

#### **Class1: Dry & Clean**

Topsoil or clay only, with a low moisture content (5% moisture content or less). No rubble, concrete, vegetation or rubbish.

#### **Class2: Damp or Unstable**

Damp material with a moisture content exceeding 5%, or material with small amounts of rubble or concrete.

#### **Class3: Wet or Mixed**

Wet material or material containing quantities or pieces of concrete, rubble and/or vegetation.

#### **Class4: Other**

This is the "Other" category. It may require mixing, sorting or other special treatment on site. It is either:

- Very Wet or
- Mixed material or
- Burnable material only, e.g. vegetation free of soil.

**Concrete**

Clean concrete. Must not include soil or other debris.
