SPRING WIND®

Exceptionally Effective Herbal Products

- Practitioner-quality products backed by years of professional use.
- Produced in small batches with high-quality Spring Wind® brand herbs.
- Made in the US with all-natural ingredients and without petroleum products, parabens, carmines, lanolines, GMO's, or isopropyl alcohol.

Spring Wind Herbs, Inc. was founded by Andrew Ellis in 1992 to meet the herb needs of practitioners of Chinese medicine and allied health professionals.

Our line of Spring Wind Herbal Products (ointments, cremes, salves, and liniments) is made with our high-quality, carefully tested Spring Wind herbs.

Over the years, we have searched out the highest-grade bulk herbs. Our emphasis has always been on species identification, herb quality, and proper testing. Long ago, Spring Wind brought the issue of the use of incorrect herb species to the forefront, and was the first company to introduce a lot-based testing system for a comprehensive list of (now over 400) pesticide residues.

Our principles have been unchanging. We procure herbs and produce products we would use for our families, and provide the helpful service we would expect from our friends.
