

Montessori Learning Area

Louise
KOOL & GALT

This Montessori learning area is a versatile multifunctional space, perfect for arts & crafts or STEM exploration for younger children.

Display Montessori materials with pride on beautiful hardwood shelves. Choose from open, closed (pictured here) or translucent. Community Playthings' **Montessori Shelves** bring the warmth of natural wood to the classroom, creating a calm and relaxed learning environment.

Classroom Tables are both heavyweight and beautiful. Best quality wood laminate is infrared sealed on all sides, even underneath, for a flat, warp-resistant surface. Choose from tool free Height Adjustable legs (pictured) or fixed-length Rock Maple legs. Both styles screw into the leg housing, tool free.

The **Sweep Shelves** with open backs have beautiful smooth curves perfect for dividing and defining a learning area, with gentle curves, while allowing access to materials from both sides.
