

The ECHELON Modular Wine Racks are perfect for wine cellars, wine cabinets, kitchens, and any setting where aesthetics are paramount – be it homes, restaurants, bars, or wine stores.

ECHELON is a modular bottle storage system made from extruded aluminum profiles. The individual S-shaped modules click together and stack to create a beautiful ribbon-like form.

The modularity, which allows the addition of individual modules, enables the customization of the rack to align with the available space. Ideal for wine cellar racking and unusual spaces such as under stairs.

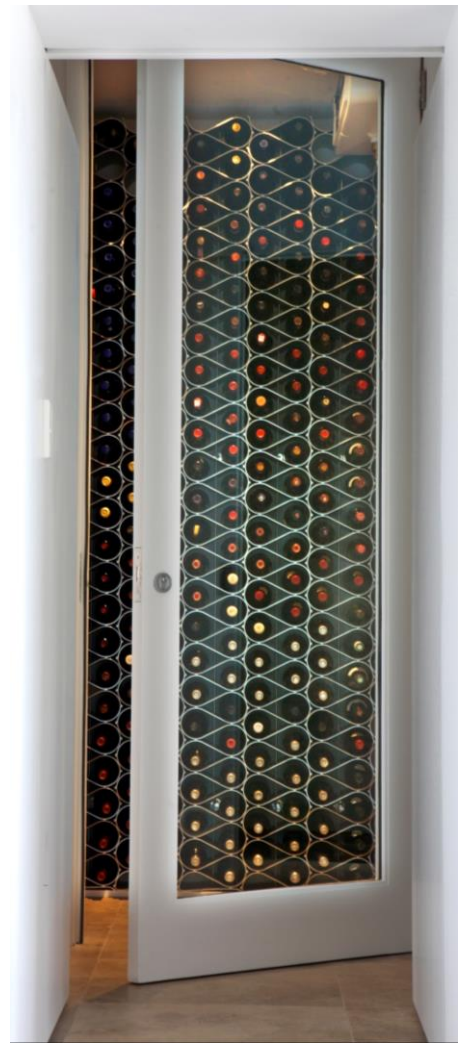

ECHELON is designed for easy installation into kitchen cabinets and custom joinery, and can also install on a bench or countertop.

ECHELON offers a unique design and functionality, setting it apart from traditional wine racks. Fabricated from aluminum extrusion and completed with a natural satin anodizing finish, the 'S' shaped modules slide together to stack vertically and nestle side by side, allowing the creation of a wine rack to suit any space and accommodate any number of bottles.

ECHELON is ideal for those planning to gradually build a wine collection over time. Its design facilitates the easy addition of layers as the collection expands, eliminating future storage concerns and offering unmatched expandability to accommodate a growing wine collection effortlessly.

ECHELON caters to various storage needs with two distinct offerings: **KITS**, available in capacities of 6, 12, 24 and 36 bottles for your convenience, and **CUSTOM SIZES**, tailored to seamlessly fit your space.

WINE RACK KITS

ECHELON Kits are offered in capacities of 6, 12, 24, and 36 bottles, catering to a variety of storage needs. Engineered for adaptability, these kits can function independently or be integrated to fulfill specific storage requirements. The seamless nesting of multiple kits provides a unified storage solution, demonstrating not only functionality but also a sleek appearance.

WINE RACK KITS

Should you be in the process of constructing a wine cellar or wine cabinet, or have a specific space you wish to optimize, we offer custom quantities to meet your needs. Explore our interactive Custom Size Calculator by clicking the link below, and configure the ideal size for your space.

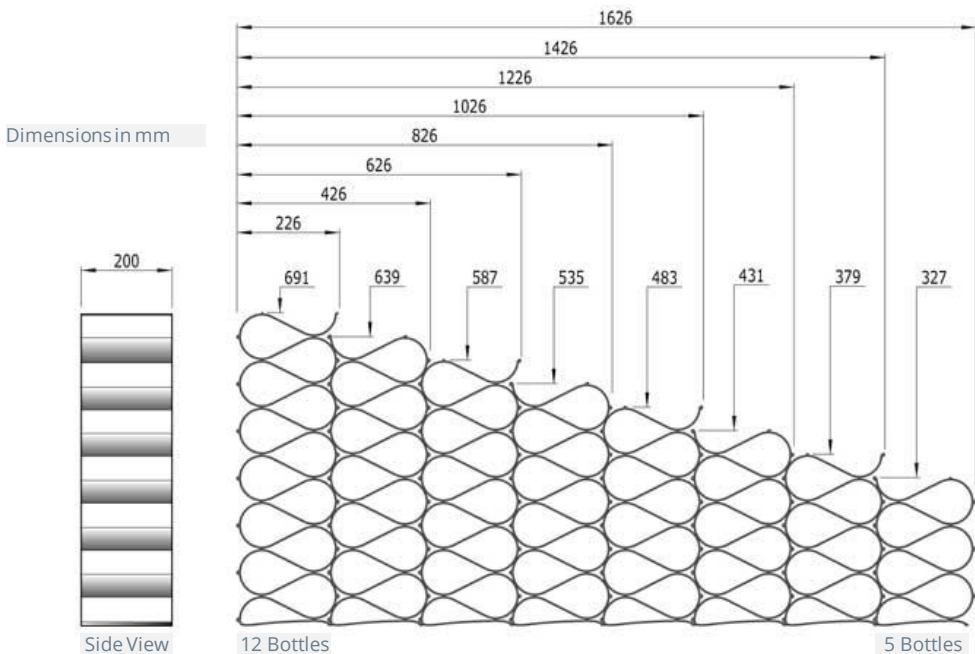

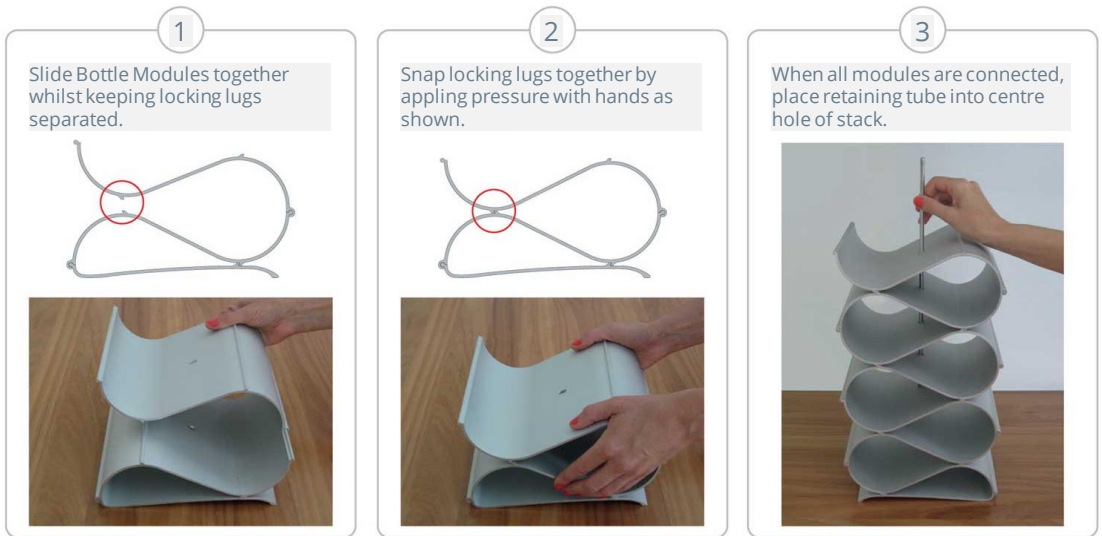

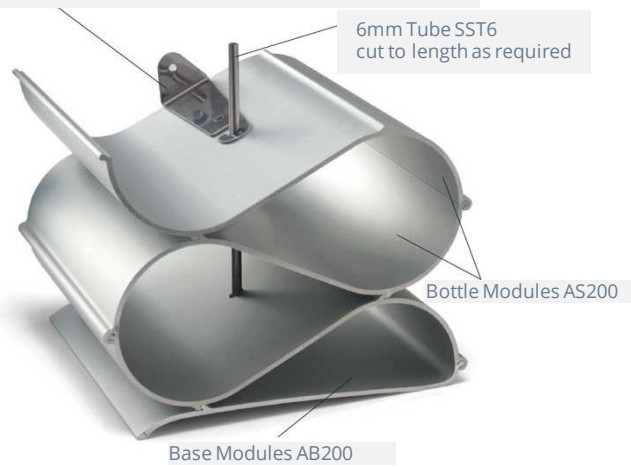

[CUSTOM SIZE CALCULATOR](#)

ECHELON is adaptable for unconventional spaces such as under a staircase. If you have a non-rectangular space, send your measurements and we'll work out some options.

Rack assembly is fast and simple. It takes only a few minutes to clip them together.

Assembly starts with a Base Module - onto which the required number of Bottle Modules are stacked. The individual modules slide and snap together to provide a seamless, flowing, organic shape. Each module forms the lower half of one bottle cavity and the top of the next, enabling the building of stacks as high as you need. Multiple stacks can nest side by side to create a continuous free-flowing storage wall.

Wall Bracket WBA1
Recommended spacing : use one at top and bottom of stack; or every 800mm (approx. 15-16 Bottle Modules)

How To Order

If you are a **Wine Storage Related business partner**, simply send us an email (info@winestoragerelated.com) or call us (+1 905 617-6106) to initiate the order process.

For **end users**, please email us at info@winestoragerelated.com. We'll connect you with one of our Wine Storage Related business partners to assist and process your order.
