

Rolling Door Lock Kits

These small lock kits are designed to be mounted on the edge of the opening over which the rolling door slides, and are available in black or stainless steel.

- 1) The lock mounting plate screws onto the opening with 3 screws; 2 round head screws on the top and bottom, and a flat head screw (not visible in the photos) in the middle.
- 2) The moving lock plate mounts using the 2 round head screws and 2 washers.
- 3) The rolling door lock plate mounts on the edge of back face surface of the rolling door. Note that a $1/8" \times 1-1/2"$ slot that is $1/4"$ deep must be cut into the door. This rolling door lock plate mounts over the slot.
- 4) The lock is set by rotating the moving lock plate into the slot on the rolling door lock plate.
