

Important Information about your new Wooden Tub:

No installation instructions required! This tub couldn't be easier to install. Just place it at its desired spot and then connect the drain. If your model includes the tub filler you will also need to connect it to the waterline.

1 year warranty against manufacturing defects.

Maintenance Tips:

* **Keeping it Clean:** This tub does not require any special cleaning products and you should never apply harsh chemicals to the wood. To clean, simply use a fresh towel with hot water and mild soap. Keep the tub clean after every use to ensure a long lasting finish.

* **Making it Last:** These tubs are designed to be used on a regular basis. If the tub is not used on a weekly basis, it is recommended that you rinse it down every couple of weeks to ensure it maintains proper moisture levels especially if used in a dry climate. This will prevent cracking or splitting of the wood caused by drying out. If you plan to not use the tub for a month it is recommended that you leave the tub filled with 1/3 of water. For longer periods of time, increase the water level to 3/4.

* **For indoor use only.**

Keep out of direct sunlight and safely away from any fireplaces.
