Think Scent

AromaPro
Essential Oil Nebulizing Diffuser
IMPORTANT
Please comply with the following for safety reasons.

- Do not modify or disassemble the scent machine without first consulting AromaTech.
  In case of product failure please contact us.

- Do not use the power cord if it is damaged, kinked or cut. It's a fire hazard.

- To avoid electrical shock, do not touch the power adaptor or the machine while plugged into the electrical socket during a thunderstorm or lightning.

- Do not dismantle or try to repair the machine while its plugged into the electrical outlet or in operation.
DISCOVER THE POWER OF SCENTING!

Scent is a fantastic way to express yourself, reduce stress, enhance happiness, give your memory a boost, increase your energy, sleep better, and uncover a host of other benefits. The AromaPro will change the way you think about scents and reveal a multitude of ways to use in your home or business. Simply add your favorite AromaTech scents and transform your space in to whatever you need it to be. The AromaPro allows you to easily tailor your scent experience to your preferences and your space. With unique cold-air diffusion technology, this diffuser scents your environment subtly and consistently while preserving the quality of your 100% Essential or Aroma Oils.

Its sleek design and modern aesthetic look will help you make any space more inviting and vibrant.

FEATURES

- Scents 4,000 square feet of space
- Heat-free cold-air diffusion technology that subtly disperses essential oils in to the air
- Connects to HVAC / AC
- Wall mount or stand-alone
- Adjustable fragrance intensity and hours of operation
- Quiet and energy efficient
- Eco-friendly and made from recycled aluminum
- No water or heat
- Leaves no residue
The AromaPro uses nebulization (cold-air diffusion) technology to diffuse our aroma oil blends, this is a process that breaks down the oils into a very fine dry mist. Nebulization preserves the intention and integrity behind our oils while maximizing their olfactive and therapeutic powers, without diluting in water, solvent, or using heat.

This patented nebulizing technology, combined with our commercial fragrance oil blends, produces nanoparticles that suspend in the air for several hours creating a clean and consistent ambient scent, without chemical undertones.

Commercial fragrance diffusers help to create an emotional connection with consumers by creating lasting impressions, memories, and multi-sensory responses, all while increasing energy, inspiring brand loyalty, improving sales, masking unpleasant odors, reducing dust, pet dander allergens, and other airborne allergens from non-living matter. Cold-air diffusers support healthy indoor air quality while providing ambiance and well-being for you, your employees, and clientele.

Diffusing helps to reduce dust, pet dander allergens, and other airborne allergens from non-living matter (e.g. dust mite matter allergens) while AromaTech’s 100% all natural diffuser blends bring nature’s goodness into your space by supporting harmony and balance.

Using only AromaTech essential and aroma oil blends will guarantee the best performance of your diffuser. No mixing or diluting with water, carrier oils or alcohol is required. Simply fill the bottle with what nature created and enjoy!

WHERE TO PLACE THE DIFFUSER

**Applications:** aromatherapy, ambient scenting and odor control in home or business.

**Location:** The AromaPro is designed to be used as a table-top, wall mount or HVAC connected unit.

**Scenting Coverage:** AromaPro can be adjusted to scent an area ranging from 100 to 4,000 sq.ft. (10 to 400 sq.m)

**Scent Intensity:** Adjust your scenting experience and hours of operation through the internal touch LCD timer.

**Device Location:** The most important element of your scenting experience is to properly position the device in the room, to ensure optimal performance and control.

**Below are our suggestions**

- Choose the location where the aroma oil molecules can use the natural airflow in a room. This is particularly important with air-conditioned spaces. The best location for the AromaPro is where there is a lot of airflow.

- If you are not sure of the direction of the airflow, simply turn on the AromaPro and using a flashlight point it at the scent output and watch where the scent will travels. Alternatively, light up a match and blow it out immediately. The direction of the scent or smoke will tell you which way the fragrance will travel.

- The AromaPro is a luxury and aesthetically beautiful device. Always keep it in an open area and do not hide it behind or under pieces of furniture.

- Try a variety of locations and settings until you are happy with the scent coverage. Give AromaPro a little time to adjust to the new location and setting before changing it again.
INSTALLATION INSTRUCTIONS

AromaPro can be used as a portable device, wall mounted or connected to your HVAC unit. If you are wall mounting or connecting the AromaPro to the HVAC, please follow the below instructions. If you are using the device as a free-standing unit, please go to page 15 to set up the timer.

Parts and Tools Required

You will require the following tools to wall mount or connect the AromaPro to your HVAC. If using AromaPro as a stand-alone or shelf top unit no installation or tools are required.

1. A level to ensure the wall mount bracket is exactly horizontal.
2. A hammer for the dry wall anchors.
3. A Philips screwdriver to match the screws provided or any other screwdriver that matches the screws to attach to the anchors you have selected.
4. Drill and a drill bit to drill a hole for the hose guide. (for HVAC installation)

Mounting Wall Bracket
Wall Mounting:

1. Always make sure the AromaPro is mounted straight up.
2. Attach the wall bracket with all the supplied screws or nails (depending on the surface).
3. Hang the machine on its hinges.

Filling the oil bottle:

1. Unplug the machine from the outlet.
2. Open the door.
3. Unscrew the bottle.
4. Fill the bottle with fragrance.
5. Screw the bottle back on the machine straight and snug.
6. Close the door.
HVAC INSTALLATION

HVAC Pre-installation Checklist

Please complete this checklist before installing the scent diffuser

1. Confirm the area to be scented.
2. Locate the Air Handling Unit or duct that serves the area to be scented.
3. Make sure the Air Handling Unit does not use an open gas flame.
4. Locate and mark the optimal position for the Scent Point.
   (See Figure A page 13)
5. Locate and mark the exact location for placement of the scent diffuser.
   (See Figure A page 13)
6. Confirm the distance between the Scent Point and the proposed scent diffuser location. (Air tube should be max 3 feet. Avoid dips and coils or lows in the air tube. The Scent Point should ALWAYS be higher than the scent diffuser).
7. Locate and install 110 or 220V AC power outlet close to the diffuser install location. Avoid placing the power outlet directly under the scent diffuser.

Scent Diffuser Positioning
It is important to locate an insertion point where the scent output will be smoothly drawn into and mixed with the airflow. This usually means those parts of the AHU where the static pressure is negative.

Ideal locations:
- Before the supply fan with injection through the wall of the AHU. Positioning immediately before the fan and after the coils if possible or in the mixed air chamber.
- Behind the blower with the entire scent diffuser mounted inside the AHU in the mixed air chamber.
- Outside the AHU in the Supply Air duct.
Scent Diffuser Positioning

It is important to locate an insertion point where the scent output will be smoothly drawn into and mixed with the airflow. This usually means those parts of the AHU where the static pressure is negative.

Ideal locations:

• Before the supply fan with injection through the wall of the AHU. Positioning immediately before the fan and after the coils if possible or in the mixed air chamber.
• Behind the blower with the entire scent diffuser mounted inside the AHU in the mixed air chamber.
• Outside the AHU in the Supply Air duct.

Best practice when installing in an AHU is to place the hose guide after the heating and cooling coils. If this is not possible, the scent output can pass over hot water, steam, chilled water, and DX coils.

Open gas flames should absolutely be avoided. If installation must be over gas heated coils or open gas flames, contact AromaTech Technical Support.

The best location for the Scent Machine is below the Scent Point. The air tube should be run upward as short a distance as possible and NEVER MORE THAN 3 FEET. If an upward air tube run is not possible, care should be taken to support the hose to prevent sagging or any low spots in the run to avoid any possibility of condensation and liquid collection which will block the scent output. Give the air tube an upward slant along its run (See Image below)

**Tube Connection on Air Duct**

CORRECT

CORRECT

WRONG. Tube has a pocket, this part will fill up with oil.
Connecting the Diffuser to HVAC.

Refer to the AromaPro HVAC Connection Diagram FIG A.

The AromaPro is a versatile and powerful commercial scent diffuser. If you decide to connect it to your HVAC system follow the below steps. Diffusing the scent via HVAC will allow you to cover multiple rooms and zones. To scent the right zones, check with your HVAC provider or Mechanical Engineer to determine which HVAC unit to connect to.

**NOTE:** The AromaPro can cover 4,000 sq.ft. of space. If you have more then 4,000 sq.ft. you will require a larger unit from our Air Stream line.

1. You will want to choose the air handler you want to connect to. If you have multiple air handlers select the one that will cover the area you wish to be scented. Consult your HVAC supplier if needed.
2. With a metal drill bit designed to drill through sheet metal, drill a hole the size of the hose guide in the air duct directly after the blower. Make sure you are tapping into the supply side of your duct, not the return side.
3. **IMPORTANT:** Never install before the coils or filters as the filters will dilute the scent and you will not get the same result.
4. Once the hole is made, insert the hose guide. The hole on the end of the hose guide should be pointing with the air flow not against it. This allows the scent to travel in the same direction as the air flow.
5. Secure the hose guide by screwing it to the duct.
6. Screw in the supplied HVAC adaptor into the hose guide.
7. Take a second HVAC adaptor and screw it into the AromaPro.
8. Either wall mount the AromaPro to the duct, the wall or place on a shelf directly under the Scent Point connection. It’s important to keep the AromaPro as close as possible to the scent point. MAX AIR TUBE LENGTH SHOULD BE 3 FEET.
9. Cut supplied air tube to length to go from the AromaPro to the hose guide. The distance between the AromaPro and hose guide should be as short as possible. MAX 3 FEET. Do not leave any slack. Coiling or excess of the air tube will create air pockets and buildup of scent inside the tube.

10. Connect the AromaPro to the 110V-240V plug and set the timer.

**IMPORTANT:** Do not drill through a coil, or before the filters.
**Warning:**
After installation, please keep the machine vertical. Tilting or placing it flat may cause an oil overflow. If the AromaPro is tilted, the oil will over flow inside and may potentially damage the machine.

![Wrong](image1.png) ![Correct](image2.png)
**Timer Settings**

**Power ON**
Connect the 12V adaptor to the outlet and turn ON the power switch. Local time and scent intensity level will appear.

**Screen Lock and Unlock**
The LCD screen will automatically lock itself after 10 seconds if not used. Press **SET** and hold for 5 seconds to unlock the display.

**Local time setting**
Press **SET** button for 3 seconds until you hear a beep to enter local time setting menu. Press ▼ or ▲ button to choose the correct day. Then press **ENT** button to move to local time setting. Press ▼ or ▲ button to change the number. Press **ENT** button to move to another position. Press **SET** to confirm (Figure 1).
Setting Hours of Operation

There are 5 working periods available to set the hours of operation (Figure 2). Touch SET button to set working period 1 (ON 1 & OFF 1). Press ▲ or ▼ button to adjust the ON time hours, then press ENT to move to the next position. Press ▲ or ▼ button to adjust the ON time minutes, then press ENT to move to the next position. Press ▲ or ▼ button to adjust the OFF hours, then press ENT to move to the next position. Press ▲ or ▼ button to adjust the OFF minutes, then press ENT to move to the next position.

Now select the Day(s) of the Week for this working period. Use the ▲ or ▼ button to turn ON (Figure 3) or OFF (Figure 4) the day for this time period. Press ENT to move to the next day. When you have your day(s) selected press SET to move to Time Period 2.

For multiple start and stop times, repeat the above for time periods 2 through 5 as desired. Please note that if you only want one start and stop time per day, you can touch SET several times until the display shows the current time of day.
Setting Scent Intensity

You are now ready to start scenting. Remember, the AromaPro is a high performance adjustable device capable of scenting spaces from 100 to 4,000 sq.ft. Once the fragrance is in the device, basic operation is simply adjusting the scent level to match the room size, conditions, and your taste. There are 1-20 grades of intensity.

Using the UP ▲ button and DOWN ▼ button to control the scent intensity.

Start at minimum and watch the scent spread throughout your space. If needed, adjust the buttons to increase or decrease the intensity accordingly.

This is a unique and powerful performance feature of the AromaPro. Once you have chosen the right setting, you should only have to adjust slightly with the different fragrances.

**Note:**
1. Above data is based on using AromaTech aroma oil.
2. Using another type of oil may affect the consumption rate.

**Recommended Intensity Settings.**
The grading system starts from 1 being the lowest and ends with 20 being the highest. Short but frequent bursts are recommended. Using the lower settings will allow for a subtler scenting experience without being over powering. Intensity setting is personal and depends on multiple factors, such as air flow, the location of the scent machine and how subtle or strong you want the scent to be. Use your discretion and start out at Grade 1 and work your way up if needed.

To test if the intensity is too strong or too light, leave the scented area for at least 5 minutes and re-enter after getting some fresh air. Only then will you be able to tell if the intensity grade needs to be adjusted up or down.

Please note that the human nose gets used to a fragrance after 30 minutes of exposure. If at any point during the diffusion process you don’t smell the scent anymore simply leave the scented area and reenter after getting some fresh air.
MAINTENANCE

Machine cleaning:
1. We recommend cleaning the AromaPro every 2 months.
2. When changing oil clean out the diffuser.
3. If scent diffusion becomes weak, cleaning is recommended.

Cleaning steps:
1. Empty the oil from a canister and replace with 20ml of rubbing alcohol.
2. Screw the bottle into the diffuser and turn the machine ON for 20 min to clean out the diffuser head and tube.
3. Pour out the rubbing alcohol (no rinsing required) and replace with your favorite aroma oil blend.

Tips:
You can start using the scent machine immediately after cleaning it. There is no need to wash the tube.

IMPORTANT

• If the screen crashes, press ENT and hold for 5 seconds to reset the machine and bring it to factory settings.

• After installation make sure the diffuser, bottle and pump box are ALWAYS vertical and not tilted or on its side.

• When the machine is on pause and not diffusing the atomization icon will be displayed.
Before submitting a warranty claim, please try the below steps to diagnose the problem and fix the issue. For warranty information, please contact AromaTech at 1.888.276.6245 or send us an email at help@aromatechsystems.com

### TROUBLESHOOTING

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>No diffusion</td>
<td>- Check if the power is ON or OFF.</td>
</tr>
<tr>
<td></td>
<td>- The pump is damaged and needs replacing.</td>
</tr>
<tr>
<td></td>
<td>- If there is no diffusion or it is weak, replace the oil with rubbing alcohol and run it through the machine for 5 min.</td>
</tr>
<tr>
<td>Little or no spray coming out</td>
<td>- Atomization head is blocked. Clean diffuser by running rubbing alcohol through it. Or replace diffuser core.</td>
</tr>
<tr>
<td></td>
<td>- Diffuser core with straw is missing or damaged. Replace with a new one.</td>
</tr>
<tr>
<td></td>
<td>- Pump is damaged and may need replacing.</td>
</tr>
<tr>
<td>Diffuser spraying liquid</td>
<td>- Diffuser core is damaged. Replace diffuser core.</td>
</tr>
<tr>
<td></td>
<td>- Machine is tilted or angled. Make sure it’s upright at all times.</td>
</tr>
<tr>
<td>Oil leaking</td>
<td>- Bottle is loose. Screw it in properly and straight.</td>
</tr>
<tr>
<td></td>
<td>- Seal is broken or missing. Replace the supplied seal that came with the machine.</td>
</tr>
<tr>
<td>Abnormal sound</td>
<td>- Pump is loose or damaged. Tighten the pump or replace.</td>
</tr>
<tr>
<td>No display on screen</td>
<td>- Make sure the power is ON. Press SET for 5 seconds.</td>
</tr>
<tr>
<td></td>
<td>- Check the plug for damage. Try another outlet. If plug is damaged replace.</td>
</tr>
<tr>
<td></td>
<td>- Display screen is damaged. Replace.</td>
</tr>
</tbody>
</table>
CAUTIONS

- Only use the power adapter supplied with the device.
- Never operate the diffuser if the power adapter is damaged.
- Do not use the diffuser if any part of the device is broken.
- To reduce the risk of electric shock, do not attempt to service the device in any way other than as described in the “Care & Maintenance” section of this manual.
- Do not disassemble or attempt to repair the diffuser; in the event of a problem, please contact us at (for home) 1.888.276.6245 / (for business) +1.877.347.5239 or email help@aromatechsystems.com
- When moving the device, always keep it upright and secure with both hands.
- Always place the unit on a stable, level surface, i.e., shelf or a table.
- Do not plug the unit into the wall socket with wet hand
- Do not pour water or other liquids into the bottle with aroma oil.
- Do not tilt, move, or attempt to empty or refill unit while in operation.
- To prevent clogging of the diffuser, run rubbing alcohol once a month for 15 min.
- Always turn off and unplug the device during maintenance or when not in use.
- Ensure that the power adapter is not covered or blocked when plugged in; it must be able to dissipate the heat properly.
- Do not cover the diffuser with objects or material while in use.
- Keep the device at least 24” from the ceiling.
- Use only AromaTech diffuser blends; other oils may contain fragrances, base oils or synthetics that could result in malfunction. Some single note essential oils are also too thick or heavy for use in the ultrasonic diffuser. See FAQs for more information.
- In case of smoke, unusual scent, loud noise, or other malfunction, unplug the unit immediately and discontinue use. Further use may result in fire or electrical shock.
- Do not immerse the unit in water.
- Always keep unit out of reach of small children and pets.
- Store at 0°C - 50°C (32°F - 122°F) and 5% - 95% humidity.
**CAUTION:** Always be cautious of where you place the AromaPro. Make sure it cannot be tipped over as that may cause some aroma oil to leak out. Keep out of reach of children. Avoid getting aroma oil liquid in contact with wood or other delicate surfaces.

**NOTE:** Do not place the AromaPro near an HVAC return grill, exhaust fan or vent, open door or a window as that will cause the scent to escape the space. Remember you want to work with the natural airflow not against it.

**IMPORTANT:** Keep nose clear from fragrance output when the device is operating. Instead, wave air towards nose to experience fragrance.

**TIP:** As a rough estimate, start with level 1 and go up from there. When you change a scent level, give the AromaPro some time to equalize the scent level throughout the space before you decide if you need to adjust.
FAQs – AromaPro

**Q: What size room can AromaPro handle?**
The AromaPro is fully adjustable for different size areas. It is most effective in spaces from 100 to 4,000 square feet (10 to 400 square meters). Depending on the essential or aroma oil you use it may cover more area since some oils are more potent then others. When connected to HVAC, coverage may increase. Ideal for scenting large spaces such as living rooms, large bedrooms, office space or even an entire home, AromaPro is the most potent and discrete diffuser on the market.

**Q: Where can I place the AromaPro?**
You must place the AromaPro on a flat surface where it can take full advantage of the natural airflow in the space. If placed on the tabletop or a shelf, make sure it doesn’t tip. Alternatively, you can wall mount it or connect to the HVAC. When wall mounting the AromaPro, make sure it is secured properly and is at least 6 feet off the ground and 20” from the ceiling. Refer to the User Manual for more details and how to connect to HVAC (air conditioning and heating system)

**Q: Do I need to adjust AromaPro?**
Yes! AromaPro is a very powerful device that can handle small and very large spaces. If it is set too high for the room size, it can cause discomfort for some people. Adjusting scent intensity is easy. Simply touch the up and down button on the device to adjust from level 1 (min) to level 20 (max). Start at level 1 and work your way up if needed.

**Q: How strong should I make the scent?**
Remember, less is more. The AromaPro allows you to get rid of bad odors and create a unique ambiance with small amounts of scent. Unlike other air fresheners, the AromaPro can be adjusted with a simple touch. Human noses become used to scent very fast, so if you don’t smell the scent anymore, that doesn’t mean it’s not there. Simply leave the scented area and re-enter with a fresh nose to get a better feel of how strong it is.
Q: What is the capacity of the AromaPro bottle?
The AromaPro uses a 500ml bottles. The fragrance diffuser is designed only to take AromaTech bottles specific to the diffuser.

Q: How long does the essential oil last in the bottle?
The AromaPro uses a 500ml bottle of essential or aroma oil that will last 1 month with daily usage running about 12 hours a day. To preserve the essential oil, we highly recommend using the internal 24/7 timer and set it up so that the diffuser doesn’t run at night. Depending on the essential oil you are using that time may increase or decrease. Some essential oils diffuse a lot faster due to their consistency and viscosity.

Q: What is the average oil consumption of the AromaPro?
Oil consumption strongly depends on the essential or aroma oil used. Essential oils diffuse faster than aroma oils. Average oil consumption ranges from 1ml – 2ml per hour.

Q: What if my unit does not turn on?
Check to make sure the power adapter is correctly plugged into the DC power jack and the electrical source. If hours of operation timer is set incorrectly and you are trying to diffuse during the time that the machine is programmed to be off the AromaPro will not scent.

Q: How do I unlock the LCD if it is locked and I can’t control the device?
AromaPro’s intuitive timer is designed to lock itself (shut off) after 10 seconds if not in use. To unlock the display simply press and hold the SET button for 5 seconds.

Q: What if my unit does not scent or there is almost no scent coming out?
Check first that there is aroma oil in the bottle and the bottle is screwed in straight and snug. If there is fragrance in the bottle but you still don’t smell anything then either the device is in rest or pause mode, turned off, or the diffuser core is clogged and needs cleaning. Please see “Care & Maintenance” instructions.
Q: Will the AromaPro cover my entire house?  
It can, but it depends on how big your house is and how many air handlers you have in your home. If you have more than 1 air handler, you will require an additional AromaPro.

Q: How do I connect the AromaPro to the HVAC (air conditioning system)?  
Depending on the HVAC set up of your home and amount of air handlers that service your entire home, choose the air handler that covers the largest area. Refer to the diagram on page 14.

Q: What if my house is larger than 4,000 square feet?  
In this case, we recommend switching up to the Air Stream Single or Duo. It’s a very powerful HVAC scent machine that is capable of scenting spaces up to 15,000 square feet.

Q: What type of oils can I put in my home diffuser?  
Use only AromaTech™ diffuser blends; other blends and oils may contain base oils that could result in clogging the device. Many single note essential oils should not be used in the diffuser. Single note essential oils may have a thick or heavy consistency that can clog the diffuser and cause it to stop diffusing scent. AromaTech™ diffuser blends have been carefully blended to be effective for you, and safe and easy to use in your cold-air diffuser.

Q: Is AromaPro safe to use with children and pets?  
Yes. When used as directed and only with AromaTech™ essential and aroma oil blends, AromaPro is the safest cold-air diffuser available. Make sure to request SDS if you require more info about the oil being diffused.

Q: Is AromaPro Diffuser Eco-Friendly?  
AromaTech™ diffusers are the most Eco-friendly made products on the market. Unlike aerosols, the AromaPro uses no propellants, phthalates and produces no harmful volatile organic compounds (VOCs). Unlike many air fresheners, AromaPro uses no ethanol or similar solvent to enhance the evaporation of essential and aroma oils.

Q: Warranty and Support?  
All products designed by AromaTech™ come with a 1 year limited warranty. If you have any questions or issues, simply contact us at (for home) +1.888.276.6245 (for business) +1.877.709.3157 or email help@aromatechystems.com.
scented area and re-enter with a fresh nose to get a better feel of how strong it is. You don't smell the scent anymore, that doesn't mean it's not there. Simply leave the can be adjusted with a simple touch. Human noses become used to scent very fast, so if the intensity is easy. Simply touch the up and down button on the device to adjust from level 1 (min) to level 20 (max). Start at level 1 and work your way up if needed.

Q: Do I need to adjust AromaPro?
A: Yes. When used as directed and only with AromaTech™ essential and aroma oil blends, AromaPro is the safest cold-air diffuser available. Make sure to request SDS if you require more info about the oil being diffused.

Q: What size room can AromaPro handle?
A: The AromaPro is fully adjustable for different size areas. It is most effective in spaces from 100 to 4,000 square feet (10 to 400 square meters). Depending on the essential or aroma oil you use it may cover more area since some oils are more potent then others. When using the internal 24/7 timer and set it up so that the diffuser doesn't run at night. Depending on the HVAC set up of your home and amount of air handlers that service your home. If you have more than 1 air handler, you will require an additional AromaPro.

Q: What if my house is larger than 4,000 square feet?
A: Alternatively, you can wall mount it or connect to the HVAC. When wall mounting the AromaPro, make sure it is secured properly and is at least 6 feet off the ground and 20 " (for business) +1.877.709.3157 or email help@aromatechsystems.com. Q: Will the AromaPro cover my entire house?
A: Yes. When used as directed and only with AromaTech™ essential and aroma oil blends, AromaPro is the safest cold-air diffuser available. Make sure to request SDS if you require more info about the oil being diffused.

Q: How do I connect the AromaPro to the HVAC (air conditioning system)?
A: If you have any questions or issues, simply contact us at (for home) +1.888.276.6245

Q: How do I unlock the LCD if it is locked and I can't control the device?
A: To unlock the display simply press and hold the SET button for 5 seconds.

Q: What type of oils can I put in my home diffuser?
A: Use only AromaTech™ diffuser blends; other blends and oils may contain base oils that diffuse faster than aroma oils. Average oil consumption ranges from 1ml – 2ml per hour.

Q: What is the average oil consumption of the AromaPro?
A: Oil consumption strongly depends on the essential or aroma oil used. Essential oils oils diffuse a lot faster due to their consistency and viscosity.

Q: What is the capacity of the AromaPro bottle?
A: The AromaPro uses a 500ml bottles. The fragrance diffuser is designed only to take organic compounds (VOCs). Unlike many air fresheners, AromaPro uses no ethanol or similar solvent to enhance the evaporation of essential and aroma oils.

Q: How long does the essential oil last in the bottle?
A: The AromaPro uses a 500ml bottle of essential or aroma oil that will last 1 month with daily cleaning. Please see “Care & Maintenance” instructions.

Q: What if my unit does not scent or there is almost no scent coming out?
A: Check first that there is aroma oil in the bottle and the bottle is screwed in straight and snug. If there is fragrance in the bottle but you still don't smell anything then either the device is in rest or pause mode, turned off, or the diffuser core is clogged and needs cleaning. Please see “Care & Maintenance” instructions.

Q: What if my unit does not turn on?
A: During the time that the machine is programmed to be off the AromaPro will not scent.

Q: How do I turn on the AromaPro?
A: To turn on the AromaPro simply press the on button on the device.

Q: How do I change the time that the machine is programmed to be off?
A: The AromaPro's intuitive timer is designed to lock itself (shut off) after 10 seconds if not in use.

Q: What if my unit does not turn on?
A: If the hours of operation timer is set incorrectly and you are trying to diffuse during the time that the machine is programmed to be off the AromaPro will not scent.

Q: Will the AromaPro cover my entire house?
A: The AromaPro is the safest cold-air diffuser available. Make sure to request SDS if you require more info about the oil being diffused.
