

Smart Aroma Diffuser User Manual

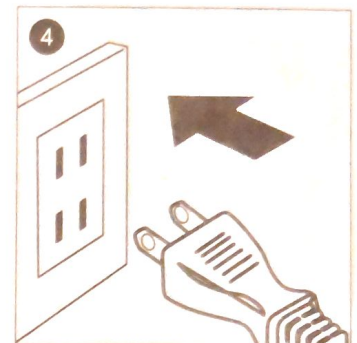

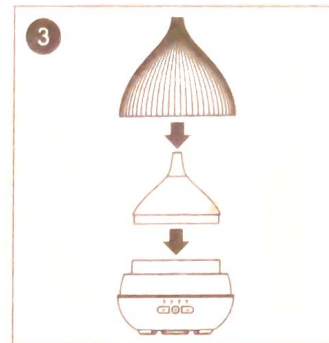

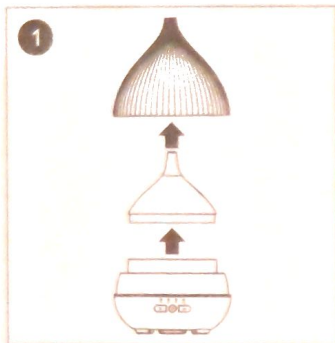

Overview

The smart WiFi enabled diffusers use ultrasonic technology to disperse the healing powers of aromatherapy in a cool mist around your living space, avoiding heat and thereby ensuring you enjoy the unadulterated essential scents of your oils/fragrance. Combining the beauty of atmospheric mood lights and beautiful design, these diffusers lend a touch of beauty to your home. They are able to be operated manually, or remote control from the App when connected to WiFi. They are also compatible with Google Home and Amazon Alexa for the convenience of voice control.

Quick Start

- ❶ Place the device on a flat, stable surface, take off the upper cover and water tank cover .
- ❷ Add water to the Max level line and add a few drops of essential oil .
- ❸ Put the upper cover and water tank cover back on.
- ❹ Power on the device.

<div style="display: flex; justify-content: space-around;"> ○ 1H ○ 3H ○ 6H </div>	Countdown timer indicators
○ LED	Network status indicator, rapidly blink:network configuration mode; slowly blink:AP mode; always ON:network works properly; always off:lost connection
	LED moon light control button,short press to choose your preferred color ;hold for 5s to turn on/off the LED moon light individually
	Short press to turn on/off the device; hold for 5s to enter into network configuration mode and reset the device
	Short press to choose countdown timer :1/3/6/continuous run; hold for 5s to turn on/off the mist individually

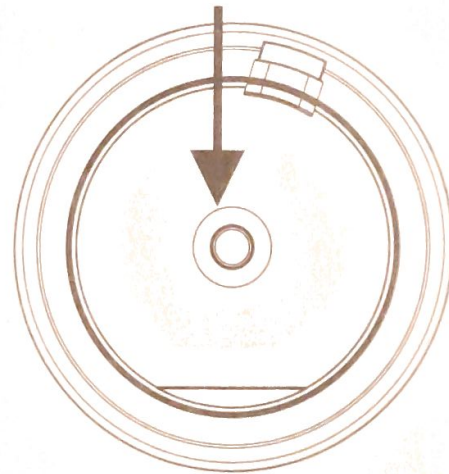

How to clean

We recommend that you clean the ultrasonic oil diffuser every time you change oils, oils are corrosive, and over time, they build up on the ceramic parts. To ensure a long life of the diffuser, follow the steps below to clean:

1. Rinse the water tank with clean water and wipe dry with a lean cloth
2. Use a cotton swab to gently clean the Mist Disc & Sensor.

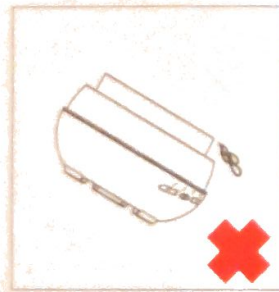

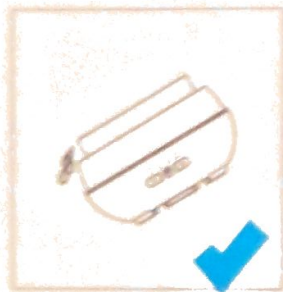

Mist Disc & Sensor.

Caution

1. Keep away from children and pets
2. Do not block the air inlet and outlet, by placing items on the air outlet or in front of the air inlet.
3. DO NOT use outdoors. For indoor use only.
4. Only fill the water tank with cold tap water. Do not use ground water or hot water.
5. DON'T pour out water from the function buttons side and the air outlet side.

Setting up the device with App

1. Power on the device and ensure your mobile device's Wi-Fi is turned on and connected to your home Wi-Fi Network.

Note: 2.4 GHz b/g/n networks are compatible, 5 GHz networks are not compatible

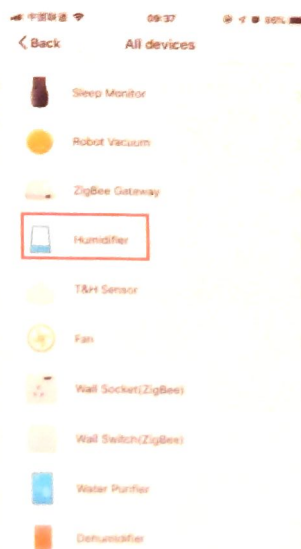

3. Search "Smart Life" in APP Store or Google Play to download the App
4. Open the App and register an account to log in.

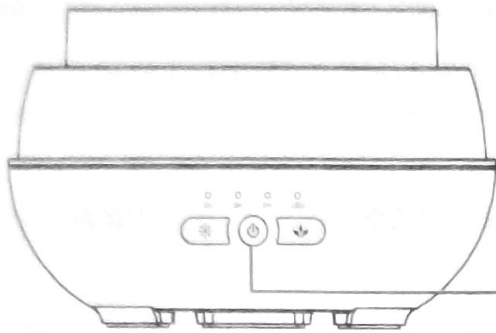

Smart Life

5. Tap the add icon "+" on the top right and select "Humidifier" from the device type list.

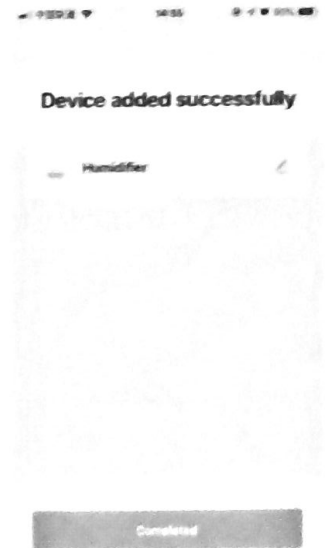

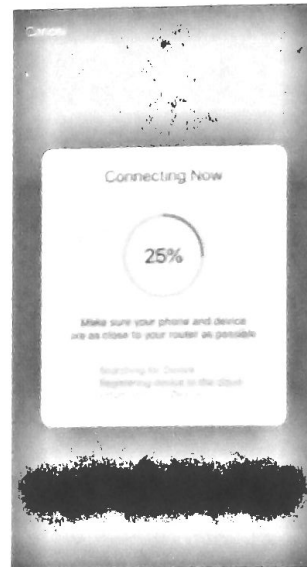

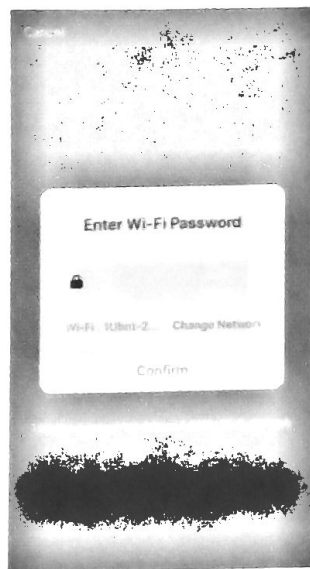

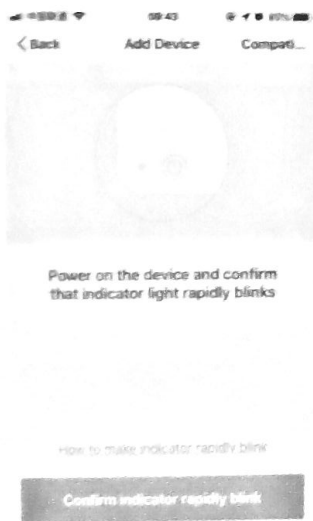

6. To make the device enter into WiFi configuration mode, hold the main power button for 5s and release until the indicator light is rapidly flashing that indicates the device is ready for setup.

Hold the WiFi button for 5s and release until the indicator light is rapidly flashing

7. Enter the password of the WiFi network that your mobile device connected and tap "Confirm"

8. The App will start connecting the device, tap "complete" once it is finished

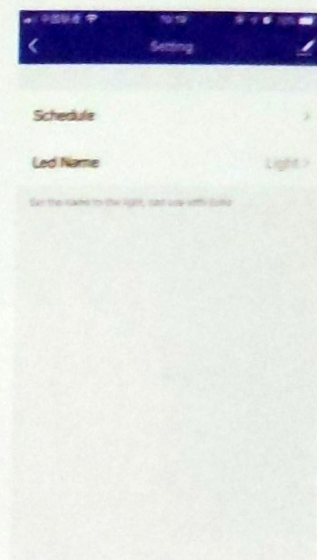

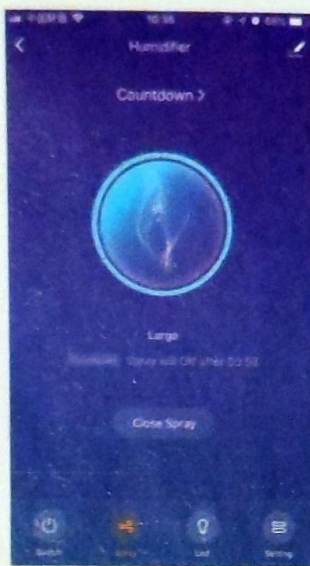

App Features

Once the device was added successfully, you will be able to quickly control it within the App or using Amazon Alexa and Google Assistant.

1. Control the spray on and off, adjust the volume of the mist
2. Control LED light on and off, change the color and brightness
3. Create a schedule or set a countdown timer for the spray and LED light
4. Share the device with your family
5. Create a scene to trigger actions automatically
6. Name the device whatever you want, the name will be used for voice control.

***The spray and LED light can be named and controlled separately**

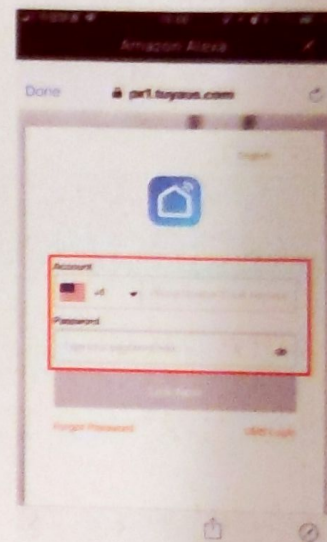

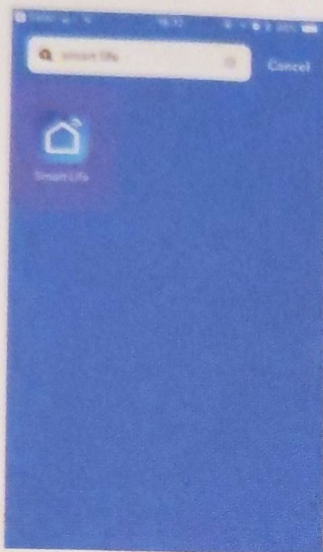

How to connect device to IFTTT

IFTTT is a service that lets you connect other services together. When an action happens with one service, IFTTT automatically triggers a separate action with another service.

In other words: "If this happens, then have that happen."

1. Open the IFTTT App, type "Smart Life" on search bar
2. Tap "Connect" and then type in your login information from the App account to finish the account linking

3. After linked to IFTTT successfully, you can make an Applet to link with other IFTTT service together. Tap "New Applet" and follow the instructions to set up your triggers and actions for your needs. You can also add Applets other users have created by searching or browsing through Discover and Search tabs.

Main Features

- Ultrasonic mist atomization, adding a few drops of essential oil, the fragrant and suitable air makes you feel more comfortable and relaxed
- 7 color background lights, a variety of changes in the mode to meet your different environments, different mood needs
- 3 timer options(1/3/6H), run as you scheduled
- Never run dry, auto shut off when water runs out
- Super quiet, never disturb your work and rest(<25dB)
- Made from anti-aging, corrosion-resistant, easy-to-clean PP material(commonly used in baby bottles)
- Supports APP to Turn on/off, change color, set timer etc.
- Compatible with the Amazon Alexa and Google Assistant for hand-free voice control

Specifications

Power supply: Input AC100~240V/Output DC24V/650mA

WiFi technology:2.4G b/n/g

Power consumption:10W

Material: PP+ABS

Timer options:1H/3H/6H

Water capacity:300ml max

Humidification:30ml±10 per hour

Continuous humidifying time: 15H max

Troubleshooting

No mist or little mist

1. Please check whether the water has run out
2. Water level is higher than the max level line
3. Clean the device as advised, if the oils are clinging to ceramic disc or sensor.
4. Turn the volume of mist to the max from the App

Failed to connect to WiFi

1. Make sure the device is under network configuration mode.
2. Make sure that the device, the phone and the router are close to each other.
3. Make sure the WiFi network password is correct.
4. Make sure the WiFi network that the device is connecting to is 2.4G, 5G networks are not supported.
5. Enable the Wi-Fi broadcast function and do not set it to hidden mode.
6. Make sure that the encryption method of the router's wireless setting is WPA2-PSK and the authentication type is AES, or both are set as automatic.
7. Make sure the Wi-Fi name does not contain any Chinese characters.
8. Make sure Ensure that the number of devices connected to the router does not reach its upper limit
9. If the router has enabled the wireless MAC address filter, try to remove the device from the router's MAC filter list to ensure the device is not prohibited by the router to connect to the network

Aromatherapy And Essential Oil

Aromatherapy is the diffusion of pure, natural aromatic essences from plants and botanicals for the purpose of promoting harmony of the body, mind, and spirit. It is a natural technique that is non-invasive yet all-encompassing in its ability to affect the well-being of the whole person through the use of one of our most powerful sense—the sense of smell.

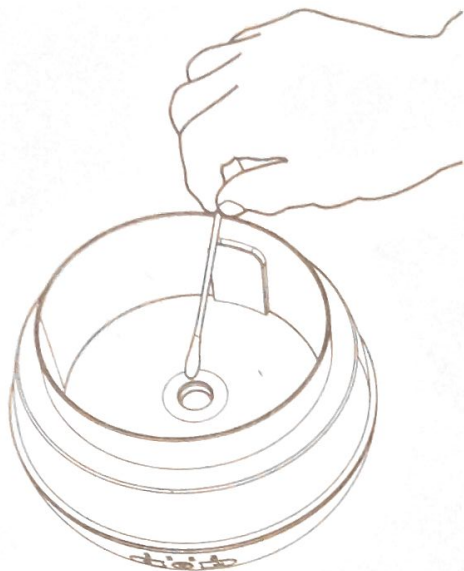

Aromatherapy works through two different methods of action. The first is through the effect of aromas on the brain, which work through the olfactory system to affect the limbic system. The second is through the direct effects if the beneficial substances naturally inherent in the botanicals that essential oils are derived from. Aromatherapy is not intended as a cure for any ailment. Rather, it helps to promote homeostasis, possibly through indirect effects on the immune system and by improving the mental state of the user.

Diffusing essential oils is one of the most popular and effective ways to enjoy aromatherapy benefits. This ultrasonic diffuser uses ultrasonic waves and water to disperse essential oils into the air. Just add a few drops of your favorite essential oil, soothing aromas released by essential oils have natural powers to transform your surroundings and create a relaxing, spa-like atmosphere.

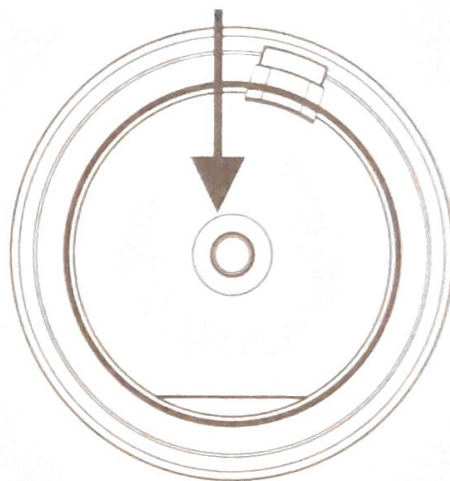

How to clean

We recommend that you clean the ultrasonic oil diffuser every time you change oils, oils are corrosive, and over time, they build up on the ceramic parts. To ensure a long life of the diffuser, follow the steps below to clean:

1. Rinse the water tank with clean water and wipe dry with a lean cloth
2. Use a cotton swab to gently clean the Mist Disc & Sensor.

Mist Disc & Sensor.

Caution

1. Keep away from children and pets
2. Do not block the air inlet and outlet, by placing items on the air outlet or in front of the air inlet.
3. DO NOT use outdoors. For indoor use only.
4. Only fill the water tank with cold tap water. Do not use ground water or hot water.
5. DON'T pour out water from the function buttons side and the air outlet side.
