

Connect your moticam Onto the trinocular tube

For all Motic trinocular microscopes we have several c-mount adapters available. The **c-mount adapter** needs to be chosen according to the chip size of the camera. Each **Moticam** (excluding the gooseneck cameras) comes standard with a CS/C-mount connection; the **c-ring** is included in the package.

Just **fix the c-mount adapter on the trinocular port and connect the Moticam to the c-mount adapter**. This combination will give you the freedom to continue observing with both eyes, while having the **Moticam** connected.

Our **Moticam** cameras can also be used on non-Motic microscopes, via the **universal c-mount connection**. Just remember that you will need the c-mount adapter from the manufacturer of your microscope.
