<b>£49.95</b>	<b>£69.95</b>	<b>£69.95</b>	<b>£69.95</b>
Comment	Excellent Condition.		

Picture not actual item, but shows the configuration of machine

#### Option 1

**OKI MC780dfnfx**

**Outright Purchase** Price

£1195.95

#### Option 2

**OKI MC780dfnfx**

**12 Monthly Payments**

11 monthly payments of £99.58

Final ownership payment £139.58

#### Option 3

**OKI MC780dfnfx**

**36 Monthly Payments**

35 monthly payments of £36.65

Final ownership payment £76.65

#### Option 4

**OKI MC780dfnfx**

**60 Month Rental Incl Cost per Copy Maintenance**

60 monthly payments of £38.68

plus:-

- 0.29p per black print
- 2.8p per colour print

which entitles you to rental of the equipment, plus labour and parts free of charge. Cover lasts for 60 months

### Installation £45/Hr

We will undertake installation of the machine configuring the machine via:-

#### Network Printing

Network Printing to a OKI Network TCP/IP port using the correct OKI PCL5 Driver.

We will install the drivers to your requirements but usually suggest that it be installed twice:-

1. Black & White
2. Colour

The default being black and white print only. The second being a colour driver, in this way if a document is printed without thinking it is only printed in black and white, to print in colour the user will need to select the OKI Colour driver.

The machine by default will check paper sizes:-

Example If you receive an email from America the email will have been created on a PC with a default paper size being Letter (216 x 279mm) when you try and print the document the printer will ask you to install Letter size paper.

If we install the machine we will set the driver to resize all documents to A4 and not check paper sizes, reducing baffling occurrences of the machine refusing to print.

#### Network Scanning

We will configure the printer by default to convert documents to PDF format and email them to a default email address, the machine holds an additional 120 email addresses within its memory this can be

useful for sending information to remote users smart phones. The service is set up using our scan@oki-sussex.co.uk email server.

A small network of 5-6 PC's will require approx 2 hours to install.

**Please note** you can install the machine yourselves or employ an IT company to install the machine for you.

But in our experience especially with Windows 10 this can lead to all sorts of strange and erratic behaviour when printing. Windows will usually always install the machine on a virtual WDS Port leading to print delays and print jobs failing. Always configure the machine using a standard TCP/IP Port with the correct OKI Driver (PCL5).

### Maintenance Options

All maintenance options exclude toner.

You can choose one of 3 options with regard to maintenance but remember a printer is just like a car eventually it will need new tyres and a clutch. Time and Materials appears very cheap in the early years of use as everything is new, eventually you will require drums, fuser units and Transfer belt to be replaced when this happens you will incur large

bills. If you compare the running costs for 60,000 prints, time and material costs will come to around £900 a cost per copy agreement would have cost £920 but you could have called us out as many times as you liked without any additional costs so choose carefully, for a long term investment the cost per copy cover is the best bet.

### Time and Materials

Pay a call out fee plus £35.00 per half hour for labour plus parts

### Annual Maintenance

Pay a call £250 per annum to cover yourself for all call out fees and labour charges, just pay for parts when required.

### Cost Per Copy Cover

Pay £10 per month plus 0.29p per black print and 2.8p per colour print which entitles you to all labour and parts free of charge. Cover lasts for 60 months
