SECTION 4: FIRST AID MEASURES

EYES: In case of contact, flush eyes well with water for 15 minutes. Obtain medical attention if irritation occurs.

SKIN: Skin contact is not anticipated to cause irritation. If irritation does occur, obtain medical attention.

INGESTION: Small amounts transferred to the mouth by fingers during use should not injure. Swallowing large amounts may injure slightly. - If swallowed, give several glasses of water but do not induce vomiting. If vomiting does occur, give fluids again. Have medical personnel determine if vomiting or evacuation of stomach is necessary. Do not give anything by mouth to an unconscious or convulsing person.

INHALATION: Due to the physical state of this material, inhalation is unlikely to occur.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS:

HEALTH:	Blue	1 – Irritation or minor reversible injury
FLAMMABILITY:	Red	1 - Must be preheated for ignition; flashpoint above 200°F
REACTIVITY:	Yellow	0 – Stable
PROTECTION:	White	K -

EXTINGUISHING MEDIA: Water Spray, Dry Chemical or Carbon Dioxide

SPECIAL FIRE FIGHTING PROCEDURES: Fire fighters should wear full-face self-contained breathing apparatus and impervious protective clothing

UNUSUAL FIRE AND EXPLOSION HAZARDS: This is a paste like material that will burn with a lazy smoldering type flame.

HAZARDOUS DECOMPOSITION PRODUCTS: Not Applicable

SECTION 5 NOTES:

This is a paste like material that will burn with a lazy smoldering type flame. As in any fire, prevent human exposure to fire, smoke, and fumes or products of combustion. Evacuate non-essential personnel from the fire area. Fire fighters should wear full-face self-contained breathing apparatus and impervious protective clothing.

Use standard firefighting techniques to extinguish fires involving this material: use water spray, dry chemicals or carbon dioxide.

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: No special clean-up procedures are required

SECTION 6 NOTES:

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Store in cool, dry, well ventilated area. Exercise due caution to prevent damage to container.

OTHER PRECAUTIONS: None

SECTION 7 NOTES:

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: In those cases where engineering controls are indicated by the use conditions, the following traditional exposure control techniques may be used to effectively minimize employee exposure: local exhaust ventilation, enclosed system design, process isolation and remote control in combination with appropriate use of personal protective equipment.

RESPIRATORY PROTECTION: Due to the physical state of this material, inhalation is unlikely to occur.

EYE PROTECTION: Eye contact should be avoided. In industrial situations, chemical safety glasses, goggles or a face shield should be selected with regard to use condition exposure potential

SKIN PROTECTION: A single relatively short exposure causes no known adverse effect. Several repeated prolonged exposures (24 to 48 hours) may irritate

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Use Standard protective equipment and clothing

WORK HYGIENIC PRACTICES: All food should be kept in a separate area away from the storage/use location. Eating, drinking and smoking should be prohibited in areas where there is a potential for significant exposure to this material. Before eating, hands and face should be thoroughly washed.

EXPOSURE GUIDELINES: No exposure limits has been established for this material.

SECTION 8 NOTES:

Available data suggests that exposure to this substance is not harmful.
