General Warnings:

DO NOT use this cane without first reading and understanding all instructions. Failure to understand all warnings, cautions and instructions may lead to injury. Please contact a health care professional or customer service before use if you have any concerns or questions about this product. Check the rubber tip for tears, cracks or wear before use. If any of these conditions exist, replace the rubber tip immediately.

BodyMed® Aluminum Adjustable Cane can provide ambulatory assistance for an individual weighing up to 250 lbs. This cane is designed to provide support, increased stability and assistance while walking.

This cane is NOT designed to support the total weight of an individual.

Before use, ensure that the adjustment push button fully protrudes through the selected adjustment hole of the cane.

This will ensure that the cane is securely locked in position.

A loose adjustment snap could result in a fall, causing bodily injury and/or damage to the cane.

Instructions for Proper Fit

To ensure a comfortable fit, make sure shoe height is the same as the shoes most worn when using the cane.

Stand in an upright position on a flat surface. With your arm hanging down by your side, the top of the cane handle should touch the inside of hand where your palm meets your wrist.

Height Adjustment

Loosen the locking collet.

Press in the snap button.

Slide the cane foot piece up or down until the snap button sticks out the desired adjustment hole.

Repeat previous two (2) steps until desired height is achieved.

NOTE: You should hear an audible “click” when the snap button is securely in place.
