

Achieve the best high end performance with cinema-quality sound from the PRO15.1 professional subwoofer. Powered by the required DSP controlled PRO1600 amplifier, the PRO15.1 will envelop your audience with accurate, dynamic bass.

The recommended system for superb sound quality and improved system balance includes two PRO15.1 subwoofers and one PRO1600 amplifier. Consider four PRO15.1 subwoofers and two PRO1600 amplifiers for greater dynamic range and optimal system balance.

KEY FEATURES

- Long excursion 15" driver
- Bass reflex design
- Dual high-flow ports
- Durable textured finish
- Shallow depth
- Grille cover
- Four position orientation
- Requires PRO1600 amplifier
