40	104	70	158	100	212
41	105.8	71	159.8		
42	107.6	72	161.6		
43	109.4	73	163.4		
44	111.2	74	165.2		
45	113	75	167		
46	114.8	76	168.8		
47	116.6	77	170.6		
48	118.4	78	172.4		
49	120.2	79	174.2		

For flower rosin pressing, there is very little reason to go much past 100C or 212F.

There are post processing techniques that will ask you to go above 100C, but this is usually not the case.

Using more heat, time and pressure is usually not the answer when pressing rosin.
