- Ideal for homecare, but can be used to clean multiple masks in a hospital setting
- 10 years Battery life
- 2 hours Charging time
- 24 months warranty

# VirtuCLEAN 2.0, a waterless PAP cleaning alternative

Proper cleaning of CPAP/Bi-Level equipment requires daily cleaning of your patients mask, and changing humidifier water. Your patient will also normally be required to clean their tubing and humidifier chamber with soap and water weekly. Studies show that patients rarely adhere to this vigorous schedule which can lead to bacteria and mold accumulation in their CPAP/Bi-Level system, causing various health complications.

Now, with VirtuOx's VirtuCLEAN 2.0 your patients can properly disinfect their CPAP/Bi-Level device and equipment!

To use this device, place your CPAP/Bi-Level mask, and humidifier chamber in your VirtuCLEAN 2.0 bag, connect your tubing to the bag and the VirtuCLEAN 2.0 device. Turn the device on, and walk away. The VirtuCLEAN 2.0 will automatically clean your system using Ozone, also known as activated oxygen, in only 30 minutes.
