AGE MEAT AS LITTLE AS **11 DAYS!**

Maturmeat®

Maturmeat® contributes to environmental protection!

Only solar energy has been used for its construction
Saving 213.6 Kg of Co2 for every Maturmeat™
produced equaling 74.760 Kg every year.

Every Maturmeat®  SAVES 213.6 Kg of CO2 from our environment

Maturmeat®

Produce your own prime quality meats!

Maturmeat® is the only maturation cabinet guaranteed, patented and manufactured 100% in Italy that reproduces a series of microclimates ideal for the traditional maturation of meat (dry aged). In as little as eleven days our system allows you to transform your meat into tender, juicy steaks, safely. Maturmeat® is equipped with an industrial refrigeration system (not monoblock). Thanks to the patented Fumotic® system, it ensures the production and management of humidity used to reduce the weight loss of the meat. In addition, since the user can smoke/avor the product at low temperatures, without any combustion, it safely keeps the organoleptic properties of the meat unchanged. Maturmeat®, unlike wet aging, where the meat from its vacuum-sealed bag must be consumed immediate after opening, allows you to hang, store and consume meat in a longer period of time without similar risks. The unit is equipped with an advanced touch screen controller, that automatically manages the temperature, humidity, air speed, pH monitoring, smoke/avoring for the duration of the recipe. The Climatouch® controller, built into Maturmeat®, allows you to quickly start your next recipe, monitor recipe values, create and save new recipes, calibrate the optional pH probe and review HACCP data. These features and more make Maturmeat® one of a kind.

FOOD EQUIPMENT

MATURMEAT® MATURATION CABINET

Made in Stainless Steel AISI 304

The most important advantage of using stainless steel AISI 304 is the fact that it is non-porous and easier to clean

Energy Efficient

The AISI 304 Stainless Steel body and doors are fully injected with CFC free polyurethane foam creating a unibody frame and higher R-value

Professional grade Non Monoblock system

Our non monoblock system is comprised of various components specially designed with the capability to be used for seasoning and dry aging, and can function in an ambient temperature range for up to +32°C (89.6°F)

Alarms

There are a number of alarms built into the system to protect the Maturmeat®

Lock and Key

Equipped with a lock and key system for additional safety

Probes

There are 4 standard probes included in all Maturmeat® units.

- Humidity probe which monitors the ambient humidity inside the entire chamber
- Ambient probe to monitor the temperature inside the entire chamber
- Evaporator/defrost probe to visualize the temperature of evaporation and controls the temperature of defrosting in order to conserve energy
- Condenser probe to visualize the temperature of the condenser

Tank

The tank system is designed to work with the Fumotic® to provide humidity when needed and aroma flavor as desired by the user.

Doors

The doors are designed and built in AISI 304 stainless steel, dual insulated glass panels with UV protection of 59%, pressure valve for high altitudes, resistance lines to minimize condensation and soften door seals at lower temperatures.

Climatouch®

A revolutionary automatic control system with a 6-inch touch screen display that automatically manages all sequential processing stages, calculating pH levels during the fermentation process guaranteeing a quality product. It includes preset recipes and allows the user to have access to the system which controls the functionality of the unit.

Pre-Calibrated pH Probe (Optional)

Our pH probe is designed to connect to a PLC and communicate data from the product to the Display, record and store it for later use.

Fumotic®

This is a dual purpose system for regulating humidity and flavoring

Guide Sets, Hanging Rods, Grills/Racks

(Not applied to MATC400TF)

Standard guide sets and rods are made from AISI 304 and are suited to distribute the weight of the maximum amount of product designed for that unit.

Adjustable Legs

All units are equipped with AISI 304 stainless steel adjustable legs for uneven floors. There is an optional 13cm (5.2") wheel kit available for those who need increased mobility.

Produce your own prime quality meats all year round
