

## THE GALET SQUARE MOTORSPORT EDITION

For the first time, Laurent Ferrier has partnered with one of its exclusive retailers, Fourtane Jewelers in Carmel, California to offer the Galet Square Motorsports Edition, a special creation limited to five timepieces that was inspired in honor of the sophisticated design shared by fine watches and classic automobiles.

Inspired by the Pebble Beach Concours d'Elegance, which is not a contest of speed, but of elegance, the Galet Square Motorsport Edition embodies the criteria of this Concours: historical accuracy, technical merit and aesthetic style.

Laurent Ferrier's intent for this model was to further evolve his original concept, the Galet, into a cushion-shaped "square" that was both handsome and sophisticated, with a slightly sportier edge than his pioneering classic. The flowing lines that are expected of Mr. Ferrier's designs have been maintained, yet the Galet Square measures 41 x 41 mm, asserting a more bold presence on the wrist.

Particular attention was devoted to respecting the proportions between the volume of the case and that of the movement. The result is a design in which every detail is honed to perfection and the lines of the design are writing a new chapter in the history of the Laurent Ferrier workshops.

### The Dial, Strap, Case and Movement

The blue dial features eleven white gold hour markers and a vertical satin-brushed finish that is a favorite with Laurent Ferrier and creates a velvety sheen that is particularly pleasing to the eye. For this special edition, the design of the small seconds has been inspired by old chronometers with the mythic "rosso corsa" color for the Breguet style Arabic numerals.

For the strap, Mr. Ferrier proposes two choices: a dark blue alligator leather with "rosso corsa" Alcantara lining and red stitching or a full Alcantara strap in gray with "rosso corsa" lining and red stitching, both offered in tribute to the sophistication of the interior of automobiles, where elegance and exclusivity is reflected in the smallest details.

Furthering the allure, this special edition is offered exclusively in a stainless steel case, a first for Laurent Ferrier timepieces.

The movement is Laurent Ferrier's esteemed self-winding FBN 229.01 calibre with unidirectional pawl-fitted micro-rotor and a three day power reserve. This is the third in-house movement developed, assembled and adjusted in the Laurent Ferrier workshops. It is equipped with a silicon escapement featuring double direct impulse on the balance. This innovation conceived by Mr. Ferrier enables the balance to be impelled twice per oscillation, a principle that required two escape wheels, and an appropriately shaped lever. This modern construction, combined with the use of cutting-edge materials, maximizes energy efficiency, thereby guaranteeing a high amplitude of the balance and reducing the amount of mechanical force required to wind the mainspring, this optimizing winding.
