Be Different

The Be fine Philosophy of Beautiful Skin.

Behind every Be fine wholesome product is a revolutionary philosophy on skin care. It reflects the idea that beauty is about how you feel and how you live-and it all starts with what you put on your body AND in your body.

Because 70% of what's put on the skin is absorbed into the body, Be fine believes 100% should provide pure benefits to the skin. If, as the familiar saying goes, you are what you eat, what does your skin say about you? Does it reflect a balanced diet full of stuff that's good for you? Or does it reflect the late night cravings and indulgences of your favorite comfort food?

Eating healthy isn't always enough to give your skin what it needs. Just like we eat a balanced meal to maintain a healthy body on the inside, our skin needs a balanced diet to nurture beauty on the outside. It all works together in synergy. That's why the Be fine products are made with nutritious, essential ingredients found in fruits and vegetables. With over 50 food ingredients, Be fine wants to feed you skin products fortified vitamins, minerals and healthy oils. Each ingredient has a specific purpose and is designed to perform as a "super food" for the skin. The result is a series of products packed with ingredients extracted from nature's best.

What is truly natural?

“Be fine simplifies the science of beauty by using ingredients inspired by nature. Whether it is Sodium Lauryl Sulfoacetate found in coconut oil, or moisturizing-rich proteins found in rice, these products are all sourced from nature.”

One Step Further...

It's about the connection between our body and the earth. Every product from Be fine comes from the earth and goes back to the earth, without any disruption to the planet. Nothing is wasted. And all of the Be fine extracts come from plants and minerals, which means no fillers, artificial colors or fragrances.
