# A SELF TANNING REVOLUTION

Get a golden glow on the go with the Nano Mist Tan Compact. The ultimate compact beauty tool that combines an amazing facial moisturizer with a self tan. So compact, it's ready to be taken with you anywhere. Using Nano Atomization Technology, tan is absorbed by the skin faster than ever before leaving it feeling soft, hydrated and refreshed. The fast drying formula builds a natural tan gradually over the next few hours. Re-apply to achieve your desired skin finish and color depth.

## NANO MIST TAN COMPACT

### FEATURES & INCLUSIONS

- 1 Back Cover
- 2 USB Charging Cable
- 3 Nano Mist Reservoir Stopper
- 4 Nano Mist Reservoir
- 5 Main Body
- 6 Spray Nozzle
- 7 Charging Port
- 8 Indicating Light
- 9 Sliding Cover

10

11

- 10 Nano Mist Drops
- 11 Mini Blending Mitt

## GETTING STARTED

### & PREPARING YOUR NANO MIST

- 1 To open, begin by sliding off the back cover.

- 2 Pull rubber stopper out to open the Nano Mist Reservoir.

- 3 Fill Nano Mist Reservoir using the Nano Mist Drops. Then push in stopper and close the back cover. The device is now filled.

- 4 Now slide down the front sliding cover to activate. The indicating light will now illuminate and mist will begin to spray.

- 5 The device automatically stops after 50 seconds. If you wish to continue using, close front & slide down again.

## USING YOUR NANO MIST

### GET A GLOWING RESULT

1. Slide front cover down, hold away from skin initially. The white light should be illuminated and Nano Mist will spray.

2. Vertically hold Nano Mist 10 -12cm (4-5") away from the skin. This allows the molecules to disperse into an fine mist for even coverage. Close your eyes and mouth and begin to work in an even motion.

3. Do not move the device too fast. A slow, steady pace will ensure even coverage and a better result.

4. If any build up or streaks occur, use the Mini Mitt to help blend away imperfections.

5. The fast drying formula will build a natural looking tan, gradually over the next few hours. Re-apply to achieve an even darker skin finish.

## NANO MIST FAQs

### & TROUBLESHOOTING GUIDE

#### 1. How long does it take to charge?

From a flat battery the Nano Mist takes 2 hours to fully charge.

#### 2. Why is no mist is coming out?

Make sure the Nano Mist reservoir is full and battery is charged. Try opening and closing the front slider as it may have timed out after 50 seconds. Allow time for mist to pass through device. The Nano Mist functions best when held in a vertical position.

#### 3. Should I prep my skin before using?

It's recommended to gently cleanse and exfoliate skin prior to using as this allows the mist to absorb effectively for an even finish.

#### 4. My tan is coming out streaky...

You may be holding the Nano Mist too close to your skin or moving too slowly. Try from a greater distance and work in a slow but steady motion. Small areas of build-up can be easily blended away with the Mini Blending Mitt.

#### 5. How many applications do I get out of one bottle?

You should get approximately 30-35 applications per bottle.

#### 6. Can I use any tanning solution in my Nano Mist?

No. Nano Mist Drops have been specially formulated to atomize in the device. Regular tanning solutions will block up the spray nozzle.

#### 7. Can I use makeup after using the Nano Mist?

Try to avoid using makeup for at least 2 hours so the Nano Mist can absorb and develop. If really necessary use a dry mineral makeup.

#### 8. Can I spray other body parts?

You can, but the Nano Mist is designed to be mainly used on the face and décolletage due to its fine mist and the size of the reservoir.

#### 9. Should I avoid getting my skin wet after using my Nano Mist?

For the first 2 hours you should avoid getting skin wet so that your self tan can develop.

#### 10. My tan is not as dark as I'd like...

Make sure when applying you're not holding the Nano Mist too far away. Try moving it closer to your skin or re-apply to build an even darker bronzed glow.

#### 11. How quickly will my tan appear and how long does it last?

Tan usually develops in 1-3 hours and will last up to 7 days depending on how often you apply makeup, cleanse or exfoliate.

## GENERAL CARE

### & SAFETY GUIDE

- Keep out of reach of children
- Do not operate without Nano Mist Drops
- Do not use with other tanning solutions. Nano Mist Drops have been specially formulated to atomize in the device. Regular tanning solutions will block up the spray nozzle
- Avoid spraying into open eyes or mouth and direct inhalation of Nano Mist spray
- Avoid using on any open cuts or wounds
- If pregnant consult your health professional before use
- To keep Nano Mist spraying evenly clean the spray nozzle with a cotton swab to avoid any clogging
- Clean with a soft wet cloth. Do not clean with alcohol or corrosive chemicals
- Empty Nano Mist Reservoir if not in use for long periods
- Store in a well ventilated, dry area
