### HEAVY DUTY MOLD RACKS

Reduce mold storage space and increase efficiency of mold change over times. Heavy objects such as molds and tools can be easily stored, remain in good condition and save space. The height of the shelf levels can be adjusted freely. Units can be constructed to custom lengths according to room space.

Experts in metal detection, separation and movement. Drawer magnets, grate magnets, complete line of permanent magnetic conveyors and conveyor components, detect all ferrous and non-ferrous metals.

Flow regulators for cooling waters. Modules of up to 12 zones.

**ORDER ONLINE**

Hot runner power and thermocouple cables in all configurations such as DME, EPIC etc. Special applications, stack molds, etc. with robotic grade cabling. Powertech mold wiring systems eliminate the mess of finding a bad zone in a maze of dangling wires. The mold connectors are pre-wired to the correct terminal block position at the factory.

Polishing stones, ultrasonic polishers, diamond tools, coated abrasives, carbide tools, polishing compound, felt products, electric & pneumatic mold polishing equipment.

**ORDER ONLINE**

### HEAVY DUTY PULL OUT DRAWER SYSTEMS

Transforms pallet racks into a drawer rack with one sided pull-out in no time.

**Rack mounted drawers** are ideal for installing on cross beams in pallet racks.

**Floor mounted drawers** are ideal for free-standing floor installation.

Heavy duty conveyors, inclined and linear, filing systems, part separators.

**SLOW SPEED GRANULATORS**  
The low speed enables you to grind tough thermoplastic materials such as ABS, PA (FV), PC, PBT, POM... with less wear, very quiet operations, very little dust and a small footprint.

**ORDER ONLINE**

**INSULATION JACKETS, BLANKETS, DROOL SHIELD AND FASTENING ACCESSORIES**  
Removable and reusable plastics equipment insulation jackets are an ideal way for plastics processors to reduce their plant energy costs, protect employees from the hazards of hot equipment, and lower the plants' ambient air temperatures. Outfitted with standard, readily available off-the-shelf components, to meet any custom fabricated requirement.

**ORDER ONLINE**

**DRUM COVERS, MOLD CHUTES, GUIDESKIRTS AND SIDE CURTAINS**  
Parts-containment solutions with custom mold-side curtains, guide skirts, tie bar sleeves, and Gaylord/drum filter covers designed to keep in-process materials clean. Prevent product loss and contamination by containing the shot and funneling it into a conveyor or box.

**ORDER ONLINE**

**VENTURI LOADERS**  
Compressed air loaders, easy to clean and operate. Stainless steel construction and 1000lb/hr material through-put capacity

### SLINGS, CHAINS AND RINGS

Provide safety and security when lifting and transporting molds and heavy parts. Industry certified.

### RESIN BINS

Complete line of portable resin bins, designed for the storage and handling of resin material. Made from high-density polyethylene for toughness, durability, effortless cleaning and visibility of contents. They have heavy-duty casters simplifying the transport and handling of bulk solids. Made with rugged powder coated steel.

Best-in-class drill, with powerful motors and very high magnetic clamping force. Free of electronic controls and automatic override sensors.

## DRY ICE CLEANING TECHNOLOGY AND EQUIPMENT

ICESonic dry ice blasting machines have a wide range of cleaning applications. They can be used to clean equipment without disassembly and without producing fire or electrical hazards.

- A unique and cost-effective solution to dry-ice cleaning technology.
- 30-50% less than the competitors.
- Rugged stainless-steel construction, lightweight and compact with a variety of fittings and adaptors to meet all cleaning needs.
- Single hose allows for longer hose and better access to difficult areas whilst maintaining high pressure and maximum cleaning power. (Note: 3/4" hose and 100psi are critical for the units to perform effectively.)
- Completely environmentally friendly.
