Brite Bite The DIY toothbrush

Important Product Safety Information

Please keep in mind that no dog toy is indestructible. Supervised use only. Do not let your dog's brush unsupervised.

Inspect brush with each use, and remove toy if damaged.

Handling Instructions:

- Supervise your dog during use
- Inspect the brush for wear and tear regularly
- Replace the Brite Bite every month
- Swap with new toy when significantly damaged

Your Dog's Safety is Your Responsibility

Always supervise your dogs while tooth brushing. It is advised to remove the toothbrush and only give it to your dogs during brushing, and take it away after done. This will prevent them from getting bored of the product and keep them safe.

If you think your dog has swallowed a toy fragment, promptly call your veterinarian.

Clean and Inspect Brite Bite Frequently:

Look for cracks, separations or missing pieces. Loose pieces larger than a food nugget can be harmful if swallowed. Worn and damaged Brite Bite brushes must be replaced immediately.

Clean and Inspect Brite Bite frequently.

Pick the Right Brush Size:

It is important to use the proper Brite Bite brush size for your dog to have the most optimal and safest brushing experience. If your dog is an aggressive chewer you may want to try a larger size or monitor them more closely while brushing.

Lifespan and Replacement Information:

Alright Brite Bite is made from very durable all natural rubber, and may last a long time, the Brite Bite is intended for use for up to 1 month. For safety and hygiene, it is recommended that you replace the Brite Bite every 30 days, just as you would with your own toothbrush.

Multiple Dog Households:

If you have multiple dogs, please be sure to prevent the larger and stronger chewers from brushing with a smaller sized brush. Be sure they have a brush that is made for their size or is made for a larger dog.

Size Recommendations:

Small Brite Bite:	Dogs 0-20 lbs.
Medium Brite Bite:	Dogs 20-40 lbs.
Large Brite Bite:	Dogs 50-70 lbs.
