The "DIY" tooth brushing Stick for dogs

## Product Information

[www.Bristly.com](http://www.Bristly.com)

## Our Story

We are passionate about developing positive experiences for our furry family members by creating products that empower them to live happy and healthy lives.

That's why we created Bristly, the brushing stick that gives dogs the ability to take control of their own oral health as they bite and play.

Being pet parents ourselves, we know how much your dogs mean to you, and ensuring their happiness and health is our number one priority. That's why we made sure to create Bristly with dog friendly materials using safe practices. We even had the product independently tested and certified by Bureau Veritas, a third-party consumer product testing lab tested to make sure that it conforms to child toy and safety standards put forth by the Consumer Product Safety Act.

## Bristly Explained

Bristly is a "DIY" brushing stick for dogs that dispenses toothpaste. Bristly was designed with dog's behaviors, anatomy, and preferences in mind with the mission to empower all dogs to brush their own teeth, and live a happy and healthy life.

Flavored bristles and body

Toothpaste dispensing reservoir

Easy to hold paw pads

Durable all-natural rubber

*"I love that Bristly empowers our pets to take care of their own teeth! With our busy lifestyles, it's often difficult to even ensure our kids brush their teeth daily, much less our pets. By using Bristly and a quality pet toothpaste, we not only can improve our pet's dental health, but also give them a fun activity at the same time!"*

## Did you know?

According to the American Veterinary Dental College, 8 out of 10 dogs show signs of periodontal disease by age three.

*"... conforms to child toy and safety standards put forth by the Consumer Product Safety Act."*

### Jessica E.

"I absolutely love the bristly brushing stick! I could see the results of using this product after the first time my dog used it. His teeth looked cleaner and his breath was much fresher. Also, my husky is an extremely hard chewer, but this product has held up amazingly. I have already recommended the bristly brushing stick to three of my doggie parent friend, and I highly recommend this product to all doggie parents. This is a great way to protect your dog's teeth and gum health."

### Jensen

"Brushing my German shepherd's teeth was torture for me and for her. So when I learnt about Bristly I was excited though a bit skeptical, as no chewing toy was working before. But as the inventor says this is rather a full-fledged brushing stick. And it works. Definitely recommend."
