

VON DUPRIN®

Pool Gate Hardware

Featuring 98/99 series exit devices

Openings often have functional requirements that may go beyond the limits of standard door hardware. Understanding that hardware solutions need to be flexible and configurable, Von Duprin's pool gate hardware is designed and built to meet the very specific needs of pool enclosures.

This customized hardware solution from Von Duprin featuring a modified 98/99 exit device paired with special trim addresses the specific application need for pool enclosures with self-closing/self-latching gates. Some of the requirements are listed below:

- Gates must swing away from the pool
- Outside release mechanism must be at least 54" from finished floor or concrete
- Mounting height requirement for panic hardware - 34-48" above the floor.

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in safety and security, with leading brands like CISA®, Interflex®, LCN®, Schlage® and Von Duprin®.
