

THANK YOU FOR YOUR PURCHASE OF A KITTY KASA™ WALL MOUNT!

You can use the Wall Mount to secure your Kitty Kasa™ module or accessory to any vertical surface strong enough to support the weight of the Kasa, the Wall Mount, and one or more cats of course!

IMPORTANT SAFETY TIPS:

- We highly recommend mounting this item to wooden building studs, beams or similarly strong, dense material that will support at least 40lbs of weight.
- DO NOT mount directly to drywall, thin plywood or pressboard, etc. Use the same caution in mounting your Kitty Kasa™ Wall Mount that you would use when installing shelving intended to hold books or other heavy items.
- Make sure your pets can safely access and depart the mounted Kitty Kasa™ unit. You can use coffee tables, sofa arms, windowsills, and other Kitty Kasa™ units to give your cats access to their elevated home.
- Do not use the mounted Kitty Kasa™ unit as a shelf, bookstand, etc.
- Do not use the mounted Kitty Kasa™ unit or the Wall Mount itself as a step.

INSTRUCTIONS:

WARNING: These are general guidelines only. You are responsible for ensuring that the mounting location is secure, and that the mounting hardware used is adequate to the task. If you are unsure of how to go about mounting the unit, consult a handy-person, carpenter, or someone with experience installing shelving.

We have provided 4 standard wood screws and 4 small washers. These can be used to safely mount the unit to wooden building studs or beams.

1. Identify the mounting location.
2. Hold the Wall Mount up to the mounting location. Use a level to ensure the unit is parallel to the ground.
3. Mark the drill points.
4. If needed, pre-drill the mounting points to make it easier to sink the mounting screws.
5. Thread washers onto screws.
6. Mount the unit by drilling in the mounting hardware. We recommend using small washers for an even more secure mount. If you are not using the provided hardware, make sure to use at least 4 screws, bolts, etc. when mounting.
7. Place your Kitty Kasa™ module on the Wall Mount. Use the 4 Kitty Klip™ pins to secure the feet of the Kitty Kasa™ to the Wall Mount. (NOTE: if your Kitty Kasa™ has rubber foot pads installed, these will need to be removed before the unit can be locked to the Wall Mount).

1 Identify mounting location

5 Thread washers onto mounting screws

2 Level mount

6 Anchor Wall Mount to surface

3 Hold in level position and mark drill holes

7 Secure Kasa to Wall Mount with Kitty Klips™

4 Drill pilot holes for mounting screws
