

EVERLAST CLIMBING INDUSTRIES, INC.

ASSEMBLY INSTRUCTIONS FOR SPIDER'S WEB

INCLUDED MATERIALS:

- 1 Bungee Web with 8 Black Clips (attached)
- 8 PVC Pieces with couplers (attached)
- 2 Foot Pieces

ASSEMBLY INSTRUCTIONS: (refer to Figure 1)

1. Place each foot of frame 10' apart from one another.
2. Join one Part A and one Part B, making sure the eyebolt faces up.
3. Attach both feet to the ends of the connected Parts A and B.
4. Press each Part C into each foot, making sure the eyebolts face inward.
The bottom half of the frame is now complete.
5. Using the floor to help create enough force, take the other Part A and press into one Part D. Be sure to push Part A far enough into Part D to create a secure fit. Be sure that the eyebolt will face down since this portion of the frame is positioned at the top. Repeat with other Part B and other Part D. You have just assembled the corners of the top of the frame.
6. If you have two people assembling the frame, attach the two corners to each other. With each person holding one side, lift and attach to each Part C.
7. If you have only one person assembling the frame, do not attach two corner pieces together. First, attach one corner to Part C. Then attach the other corner to the other Part C. Finally, join the two corner pieces at the center, top of the frame.
8. Attach Bungee Web according to Figure 1. Be sure that the short green bungees attach at the right center and left center of the frame. The long red bungees attach to each corner and the short red bungees attach at the center top and center bottom of the frame.
9. Once attached, knots and clips can be adjusted to create desired pattern in web. If portions of web are too loose, pull knots to take in slack.
10. **Important: Place mats under Spider's Web prior to beginning the activity.**

WARNING

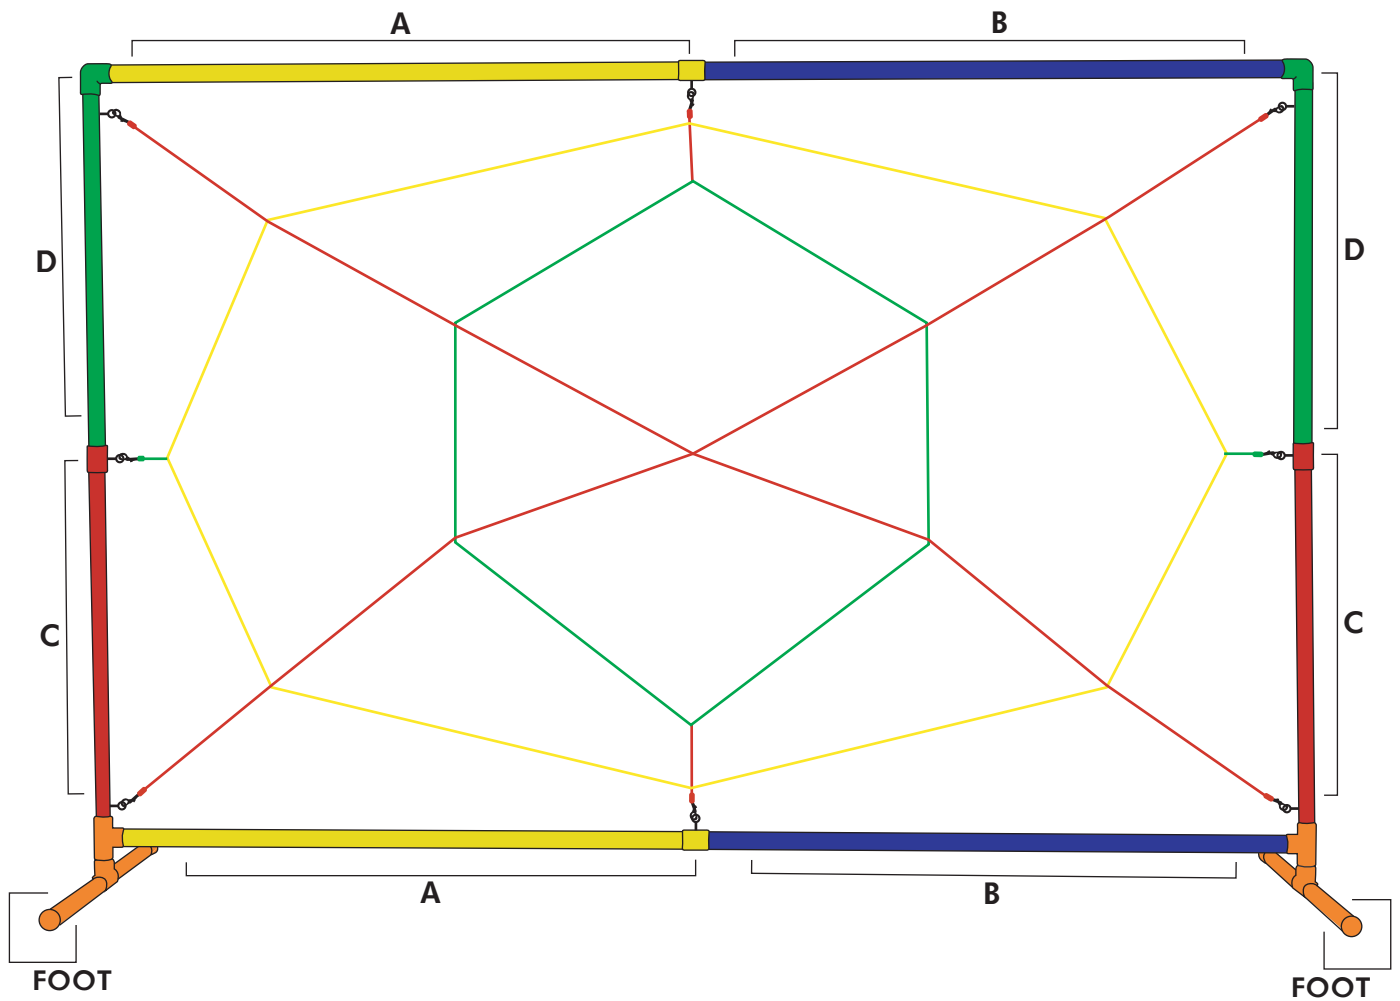

THE PROPER CARE AND ONGOING MAINTENANCE OF YOUR CLIMBING WALL IS ESSENTIAL AND IS YOUR RESPONSIBILITY. PLEASE REFER TO THE SAFETY, CARE AND MAINTENANCE INSTRUCTIONS.
