

ECOBlend® RECYCLE NATURE

Bees & other pollinators have been coexisting with the ingredients found in EcoBlend for thousands of years.

Safe & Sustainable Weed & Pest Control Products

Supports Pollinator Habitats
www.ecoblend.green

EcoBlend is a full line of sustainable vegetation management products that quickly break down unwanted vegetation into organic matter and add nutrients to the soil. The active ingredient is organic & GMO-free vegetable oil that has been sourced largely from farms in the southeastern United States. The patented fatty acid profile of the vegetable oils, made effective through the patented formulation, controls and recycles weeds and unwanted vegetation with the efficacy of conventional products, but without systemic poisons.

EcoBlend is the first and only OMRI listed organic and botanical based herbicide. The products control a wide range of vegetation, from trees to just branches and woody stems, to broadleaf weeds and grasses.

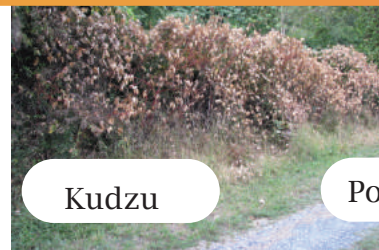

Works on everything from grasses, to broadleaf weeds to woody stems, controlling just branches or entire trees.

Works on pines & other woody stems

Kudzu

Poison Ivy & Broadleaf Weeds

Product Listing: The following products are OMRI Listed for Organic Use

EcoBlend Weed & Grass Control Burndown

EcoBlend Weed Control PRO

EcoBlend Adjuvant

EcoShield Yard & Garden Insect Control

Organic & GMO-free Ingredients

Ingredients used in EcoBlend are sourced largely from farms located in the southeastern United States. The main actives in EcoBlend products are vegetable oils that are food grade, organic and GMO-free and all natural.

The patented fatty acid profile of the vegetable oils, made effective through the patented formulation, controls and recycles weeds and unwanted vegetation with the efficacy of conventional products, but without systemic poisons. EcoBlend recycles vegetable oils from the farm back to the land, using nature to balance nature.

Products that Work with Nature

- Biodegradable, providing beneficial ground nutrients to the soil
- Natural formula, No poisons, No reuse restrictions
- No toxic residue for water, farms, residential areas
- Safe for people, animals and ecosystems, GMO-FREE
- Can be sprayed prior to planting
- Formula is low volatility; not a flammable liquid

Formula is Not Systemic & is Better for Pollinators

EcoBlend is ideal for use in site preparation of pollinator meadows & gardens, as well as site preparation for wildlife habitats in forested areas.
