HISTORY

Founded by Howard Monk in Montreal, Canada in 1999, MFE Sports has become a high-quality sportswear provider for men, women and children of all backgrounds.

Through extensive feedback and brainstorming sessions with athletes, athletic trainers, and coaches, we have educated ourselves about varied preferences of athletes when it comes to fit and to the desired materials for their sportswear. Combined with rigorous research and development, we are capable of developing a simple set of products for matching the wider ranging preferences of athletes.

Through “word-of-mouth” from athletic trainers and equipment managers, our reputation for delivering high-quality, durable and affordable products has spread across professional sports leagues, top-tier academic athletic programs, and youth sports leagues across North America. We continue to source all of our fabrics and hand-stitch all of our products from Montreal.

CUSTOMIZATION

Proudly worn by players in the NHL, CFL, MLB AND NFL!

For over two decades, we have been supplying sportswear to professional sports leagues, top-tier academic athletic programs, and youth sports leagues. Our continuous level of service, the quality and affordability of our products, and our flexibility is what has gained the trust of so many teams and leagues across North America.

SERVICES

MFE offers an array of embellishment options for your apparel including: screen-printing, embroidery and sublimation. Each customization application comes with its own set of parameters, which is why we're here to walk you through the process.

SCREEN-PRINTING

is a printing technique where a mesh is used to transfer ink directly onto the fabric. The versatility, durability and cost-effectiveness of screen-printing make it a popular choice to customize your apparel.

EMBROIDERY

is a technique that involves using a needle to apply thread or yarn onto a fabric as is commonly used to apply a decoration or physical logo onto the garment.

DYE-SUBLIMATION

is a computer printing technique, which uses heat to transfer dye directly into the fabric. Whereas the screen-printing process has the ink sit on top of the garment, sublimation fuses the ink directly into the fabric.

FABRICS

We don't just say we are made for everyone, we actually are!

Our products come in an array of different cuts and fabrics. Everyone has a different preference when it comes to the feel and fit of their training attire - that's why we offer our athletes the ability to choose the fabric and cut that suits them.

We take pride in the fact that we manufacture all of our products by hand in Montreal, Canada, and source all of our fabric locally.

COMPRESSION

90% MICRO POLYESTER - 10% SPANDEX

The **MFE Compression Line** is made from a smooth, sweat-wicking, anti-bacterial fabric designed for high-performance training. The MFE compression fabric enhances muscle support and improves recovery, while our carefully knitted flat, ergonomic seams ensure a high level of comfort. Our "Compression Line" comes in lightweight and heavyweight.

POLYESTER

100% POLYESTER

The **MFE Polyester Line** is made from lightweight polyester. Its wrinkle-resistant, anti-bacterial and non-absorbent properties are what make the fabric durable. The polyester fabric's breathability and ability to keep its form after years of washes are what make it a popular choice for training.

Our "Polyester Line" comes in: **POLYESTER DRY WEAVE** & **POLYESTER MELANGE**

HYBRID

85% POLYESTER - 15% COTTON

The **MFE Hybrid Line** was developed as a hybrid poly-cotton fabric. It is designed for the individual who likes a softer garment. The micro-polyester fabric is soft on the skin as cotton, yet the sweat-wicking, anti-bacterial and stretch properties of the polyester allow the cloth to breathe and dry quickly. This line, designed for the athlete that prefers to train in "loose fit", is also worn casually.

INTERLOCK

50% POLYESTER - 50% COTTON

The **MFE Interlock Line** is made from 50% cotton and 50% polyester and is typically worn as a relaxed fit. The interlock fabric provides a "pyjama-style" comfort feel that is a #1 choice for warm-ups, post-workout attire and general lounging.
