

FAST™

COG SERIES MOUNT SYSTEM

FAST is a series of optic mounts and platforms that provide end users with a quicker sight picture than standard height mounts. The FAST COG Series Mount was developed to work with all Trijicon ACOG and VCOG series optics. It raises the optical centerline to 2.05" above the rail for faster/easier sight pictures. These scopes come from the factory with a low mount that can impede stock weld and sight pictures while wearing plate carriers, helmets, and communication headsets. The taller FAST mount is a drop-in replacement for the OEM device and greatly aids in rapid threat engagement. The FAST COG Series Mount is also compatible with the entire FAST Offset Accessory suite for rapid transition to a Miniature Red Dot Sight. View entire line at UNITYTACTICAL.com.

INTERFACE HEIGHT RAIL MOUNT Trijicon ACOG / VCOG
2.05" to Optical Center Line
3 Cross Bolt Rail Grabber

MATERIAL COATING DIMENSIONS WEIGHT 7075 T6 Aluminum
Type III Hardcoat Anodized
3.65"(L)x1.22"(W)x1.05"(H)
2.9oz (82 grams)
