

# FAST™

## MRO MOUNT SYSTEM

FAST is a series of optic mounts and platforms that provide end users with a quicker sight picture than standard height mounts. The FAST MRO Mount, for the Trijicon Miniature Rifle Optic series, creates a 2.26" optical center line from the rail and provides faster/easier dot/reticle acquisition while wearing night vision goggles, gas masks, plate carriers, and other gear. FAST mounts allow for more rapid visual processing of the battlefield by promoting a heads-up posture. The FAST MRO Mount features a built-in, fully adjustable rear back up iron sight. The built-in rear BUIS is fully compatible with a standard front sight for a traditional sight radius. The FAST MRO Mount can also be fitted with a Quick Detach Lever. View entire line at [UNITYTACTICAL.com](http://UNITYTACTICAL.com).

**INTERFACE** Trijicon MRO  
**HEIGHT** 2.26" to Optical Center Line  
**BUIS** Fully Adjustable Rear
