

### FOCUSED WIDE BEAM

This beam pattern is an excellent choice for multipurpose activities. At close range, wide beams simulate normal daylight conditions and allow you to take advantage of your peripheral vision.

### MULTIPLE MODE

Multiple settings on many of our products give you the flexibility to adjust your light's brightness to illuminate greater distances or to conserve battery power, depending on your needs.

### BACKPACKING/HIKING

Planning to cover some ground and travel light? Maybe it's the destination – or maybe it's all the steps between. Either way, lights in this category will help you find your way (or enjoy right where you are) when the sun goes down. (Especially if something goes bump in the night.)

### FIRE/RESCUE

Difficult jobs in dangerous locations that don't give you much control over your environment. Products in this category are durable and dependable, making one less thing for you to worry about – leaving you to focus on the important task at hand.

### LAW ENFORCEMENT/MILITARY

Men and women protecting and serving in all different ways – these lights strive to be as tough, bright and reliable as the people who count on them.

### TRADE

Jobs that start before the sun rises, end after it sets – or are in dark spaces, large or small. You need a light that is going to work as hard as you do, in whatever conditions are thrown your way.

### IPX4

These lights are designed for water resistance to splashing and quick dunkings. If a light with a IPX4 rating is accidentally submerged for a longer period of time, the batteries should be removed and the cabinets should be carefully inspected for signs of battery leakage. If water has entered the housing, the light should be dried and batteries replaced.

### ULTRABRIGHT LED

The Ultrabright LED is bright and efficient. The smooth, white, wide-beam light emitted by Ultrabright LEDs is ideal for close to mid-range tasks. Ultrabright LEDs are usually grouped together to offer a more powerful light source. Advances currently underway will continue to improve the efficiency and brightness of Ultrabright LEDs. "Ultrabright" can also be yelled when using the term in conversation, but not nearly as loud as "Maxbright".

### CAMPING

Sleeping under the stars and getting away from it all. Whether you need some light to bustle around the RV after lights out, set up your nomadic home for the night among the pines, or enjoy some campfire time with friends, family (or yourself), these products will serve you well. (Maybe even in a van down by the river, we don't judge.)

### HUNT/FISH

Tree stands, duck blinds, jon boats, bass boats, streamside, dockside, backcountry camps – examples of places that have a tendency to be most productive around dawn or dusk. Check out these products to help you make the most of those hours. Also, if this icon is to scale, that is one big bass.

### SAFETY/INDUSTRIAL

Does your job require work in less than ideal environments? Sometimes you need a little extra light, sometimes you need a primary light – and sometimes, that light needs to not only be bright, but be rated to work safely in hazardous conditions.

### TRAVEL/EDC

Whether expected (a trip!) or unexpected (an unplanned turn of events), having an easy to access, dependable light on you could make all the difference, where ever you end up.
