GASCAP™

LINK SYSTEM

LINK™ USB-C TAILCAP

Featuring LINK™ System technology, the GASCAP™ USB-C Tailcap marks a paradigm shift for switching technology, bringing USB-C capabilities to weapon mounted lights and switches.

The robust performance of the LINK™ System interface provides near-zero-loss output and dependable, repeatable activation. The lateral and reversible interface on the GASCAP™ provides a variety of mounting and cable management options, while its cage protects the cable and ensures a solid lockup. GASCAP™ features an onboard full-size latching button for momentary or constant activation of your device. Made of high-impact polymer, GASCAP™ is durable in even the most austere environments.
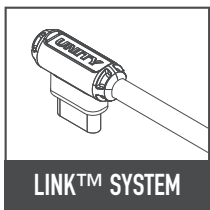

Currently available for SureFire® Scout®-style weapon lights, GASCAP™ pairs with UNITY's AXON™, AXON™ SL and ModButton™ Lite switch portfolios.
