

RAXIS™

IN-LINE MOUNT FOR BEM® MAWL®

RAXIS™ rotates the axis of the traditional off-center position of the B.E. Meyers® MAWL®, bringing the laser up onto the M1913 rail and within the profile of the weapon's receiver. While this mount is useful in other applications, it was designed specifically for MAWL® users with a need to stow their weapon in tight spaces, such as between the seat and center console of a police car or in a rotary wing asset.

RAXIS™ mounts directly to an M1913 rail and can be purchased either with a two cross bolt rail grabber or a FAST™ QD Lever.

COMPATIBILITY

B.E. MEYERS® MAWL®

RAIL MOUNT

2 CROSS BOLT RAIL GRABBER, FAST™ QD LEVER COMPATIBLE

WEIGHT

RAIL GRABBER | OZ: 1.7, G: 48.0
