

# COMPARE MANTISX MODELS - X2, X3, X7, X10

---

What's the difference between the most technologically advanced shooting performance systems? See the comparison chart below. If you're new to Mantis, [learn how our systems work](#).

## **X2**

Built for dry fire use only, the X2 provides real-time, shot-by-shot feedback for both pistol and rifle users. Track your sessions for historical, data-driven insights, and monitor your progress. An excellent option for those looking for productive training from the comfort of home.

## **X3**

The X3 adds live fire functionality, with the same engaging practice modes, same coaching, and same historical tracking data, allowing you to delve into and compare performance improvements between dry and live fire sessions.

## **X10 Elite**

Combining every Mantis X model, the X10 Elite is built to increase your performance with pistols, shotguns, rifles, and even bows. Further additions to analysis features cater to competitive and combat shooters alike.

## **X7**

The shotgun-exclusive X7 model's primary focus is on aiding skeet and trap shooters, though sporting shooters of all kinds can all find value from its feedback. Tracking your shot trace, through the data points of the shot itself, you receive unparalleled insight into your shot mechanics.
