

### ETL RATED

ETL is a Nationally Recognized Testing Laboratory and tests products to UL, CSA and CE standards. A product bearing the ETL Listed Mark is determined to have met the requirements of prescribed product safety standards. Moreover, the mark indicates that the manufacturer's production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance.

### IPX7

IPX7 lights provide waterproof integrity down to 1 meter for up to 30 minutes.

### ETL RATED

ETL is a Nationally Recognized Testing Laboratory and tests products to UL, CSA and CE standards. A product bearing the ETL Listed Mark is determined to have met the requirements of prescribed product safety standards. Moreover, the mark indicates that the manufacturer's production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance.

### MULTIPLE BEAM

This beam pattern combines focused narrow and wide beams to allow for the most versatility. At close range, the wide beams simulate normal daylight conditions so you can take advantage of your peripheral vision, while focused narrow beams provide distance illumination.

### REGULATED LED

Lights that feature regulated LEDs have a sophisticated regulating circuit that maintains initial brightness as long as the batteries have sufficient voltage. They are so sophisticated that if they had eyes, they would definitely wear a monocle. Traditional lights are very bright initially, but immediately begin to dim and continue to dim until the batteries are drained. Constant Brightness is a term used to describe products that have regulated LEDs.

### ULTRABRIGHT LED

The Ultrabright LED is bright and efficient. The smooth, white, wide-beam light emitted by Ultrabright LEDs is ideal for close to mid-range tasks. Ultrabright LEDs are usually grouped together to offer a more powerful light source. Advances currently underway will continue to improve the efficiency and brightness of Ultrabright LEDs. "Ultrabright" can also be yelled when using the term in conversation, but not nearly as loud as "Maxbright".

### FIRE/RESCUE

Difficult jobs in dangerous locations that don't give you much control over your environment. Products in this category are durable and dependable, making one less thing for you to worry about – leaving you to focus on the important task at hand.

### LAW ENFORCEMENT/MILITARY

Men and women protecting and serving in all different ways – these lights strive to be as tough, bright and reliable as the people who count on them.

### SAFETY/INDUSTRIAL

Does your job require work in less than ideal environments? Sometimes you need a little extra light, sometimes you need a primary light – and sometimes, that light needs to not only be bright, but be rated to work safely in hazardous conditions.

### TRADE

Jobs that start before the sun rises, end after it sets – or are in dark spaces, large or small. You need a light that is going to work as hard as you do, in whatever conditions are thrown your way.
