FEATURES

- One of the most versatile night vision systems available
- Offers capabilities of a handheld pocketscope, a right- or left-eye-mounted monocular and a weapon sight when mounted in conjunction with an infrared laser aiming device or other night vision compatible primary optic
- An active projected infrared LED provides short-range illumination allowing such activities as map reading
- Self-contained system operating on a single AA battery

The L3Harris M914A™ monocular is based upon the military nomenclature AN/PVS-14. This monocular is now available with improved white phosphor tube technology for greater target detection and recognition. Low-light and nighttime maneuvers appear more natural in black and white, with added contrast detail in shapes and shadows, providing the operator more visual information for assessment and acquisition. White phosphor offers various shades of intensity between black and white (over black and green), resulting in better contrast and depth perception.

Gen III Night Vision Image Intensifier (I²) Tubes are Available in Green and White Phosphor

High-Performance Gen III I² Available at FOM* Levels from 1600 to 2376+

- Low-battery indicator in eyepiece
- Variable gain control
- Autogated power supply for improved resolution under highlighted settings
- Optional accessories available

BENEFITS

- Hands-free or one-hand operation
- High-light cut-off tube protection
- Mounts available for head, helmet or weapon interfaces
- Compact, lightweight and multi-purpose uses
- U.S. manufactured image intensifier (I²) tube
