

Using the Red Roads Blaze-n-BBQ is easy!

Unzip the Blaze-n-BBQ's customised canvas carry bag.

Remove the Base plate

Next remove the folding pit and place it upon the base plate. Attach the 4 legs of the fire pit to the 4 clasps located on the base plate.

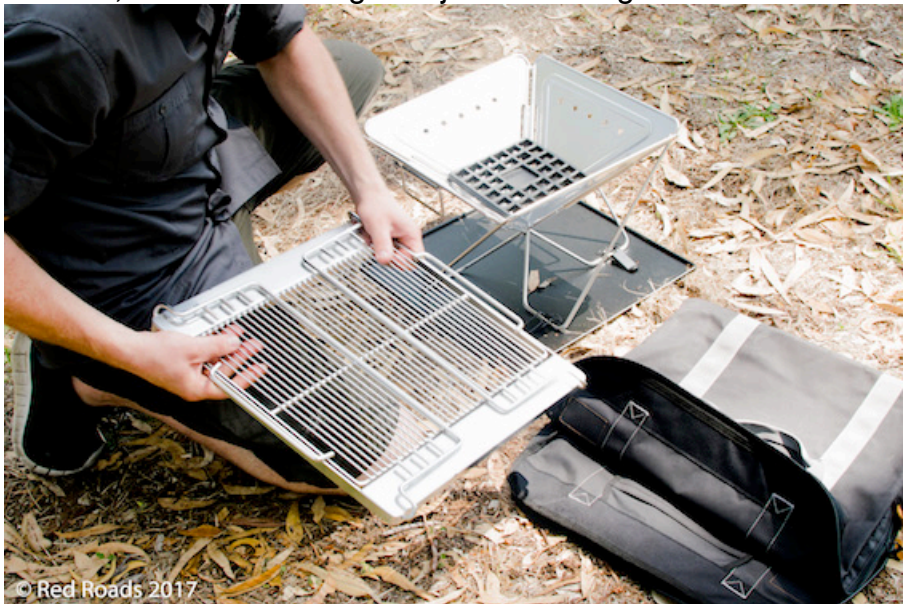

If you are planning to cook on the Blaze-n-BBQ, you may find it useful to place the Grid inside the Pit to bring the coals closer to the cooking surface.

Next, remove the Height Adjustable Bridge and BBQ Grill.

The Bridge upon which the Grill sits, has 3 height intervals. For slower grilling, use the higher setting, for faster grilling, use the lower setting.

Experiment shifting the coals to find the best combination for your cooking.

Remove the Bridge and Grill to enjoy a safe and warm campfire.

If safe to do so, the entire Blaze-n-BBQ can be moved if required using the attached handles. Ensure the fire is burning very low, take care and use thick fireproof gloves.
