

GDStore Premium Mounting Kit Installation Manual

Patented USA & Canada

Getting Ready

SAFETY NOTIFICATIONS

This Universal Mounting Kit has been designed with quality and safety in mind. A proper installation is required to ensure safety.

This Symbol and Signal Word will alert you to the possibility of injury if you do not comply with the warning. Read the warning carefully.

WARNING

This Signal Word will alert you to possible damage to equipment, parts or tools.

CAUTION

WARNING

To prevent possible **SERIOUS INJURY**:

- ALWAYS consult a trained door systems technician if garage door sticks, binds or is out of balance.
- NEVER try to loosen, adjust or move garage door springs, cables, pulleys or brackets, all of which are under **EXTREME** tension.
- Be **AWARE** of sharp edges on mounting bracket parts that may cut or cause injury. Wear protective gloves to avoid injury.
- ALWAYS keep small parts away from children to avoid swallowing. Seek medical help immediately.
- ALWAYS wear safety glasses working with tools.

CAUTION

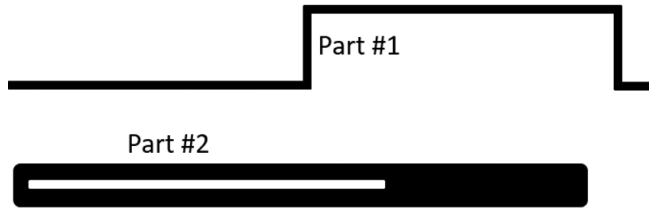

- Over-tightening of fasteners may strip them and make them ineffective.

Tools Required

- Phillips screw driver.
- Drill with 1/4 inch bit.
- Straight edge & Marker.
- 7/16 wrench, 9/16 wrench, ratchet & socket.
- Tape measure.

Parts Inventory

- | | |
|----------------------------|----------------------------------|
| 1. Part 1 bent bracket (2) | 5. Machine screws 1/4 x 3/4 (14) |
| 2. Part 2 slotted bar (2) | 6. 1/4 inch nuts (14) |
| 3. 60" angle bar (2) | 7. 1/4 inch fender washers (12) |
| 4. Hangers (4) | 8. #10-24 Machine screws (4) |
| | 9. #10-24 Nuts (4) |
| | 10. 5/16 fender washers 4) |

Assembly and Installation

WARNING

Prevent injury from sharp edges and flying objects by wearing appropriate safety equipment.

TIP * Watch the install video at www.moregaragestorage.com

STEP 1. Stand back and observe the inside of your garage door to choose a mounting location. See TIP below. Choose which panel of the garage door and which two sets of hinges will receive the GDStore Universal Mounting Bracket.

TIP * An ideal installation of GDStore looks like:

- Use the top panel of your garage door
- Install GDStore away from high traffic areas
- If possible, ensure you can access the hanging bins when garage door is in the raised position

STEP 2. Connect part 1 with part 2 according to Figure 1 using a 1/4 x 3/4 in. machine screw and nut. There are two of these assemblies. Finger tighten the slider bolt. These two completed assemblies become the Vertical Bracket Assembly .

FIGURE 1

STEP 3. Remove screws from the two sets of hinges (4 hinges total) on your garage door that you selected for mounting the bracket.

STEP 4. Mount the Vertical Bracket Assembly on the two sets of hinges according to Figure 2. Your installed Vertical Bracket Assembly may be further apart than shown in Figure 2. Replace hinge screws and tighten securely.

Side view of Vertical Bracket Assembly mounted on garage door.

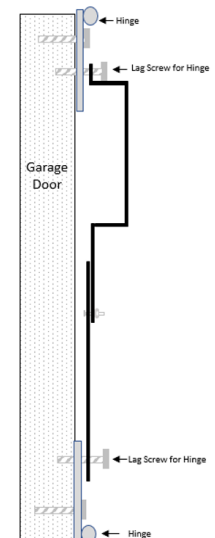

FIGURE 2

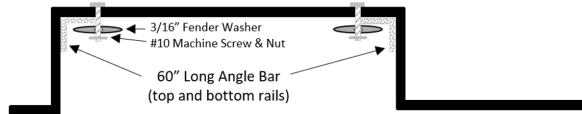

TIP * Vertical Bracket Assembly can be rotated 180 degrees if it suits your installation better.

STEP 5. Tighten securely the Nut that connects Part 1 to Part 2 in each of the Vertical Bracket Assemblies.

NOTE: Vertical support assembly and mounting is complete. Continue on to Step 6 horizontal support mounting.

STEP 6. Insert the four #10 machine screws with fender washer and nut into Part 1 that will hold the horizontal brackets. See Figure 3. Finger tighten only.

FIGURE 3

STEP 7. Select the 60" angle bar with the gold label. This will be the top rail. With the gold label facing out (Figure 5) slide the angle bar between the bent bracket and the fender washer on the #10 machine screw (Figure 4). Slide the angle bar horizontally to the position of your choice. Securely tighten the screws at each end.

STEP 8. Repeat Step 7 with the silver labeled bar as the bottom rail.

TIP * Make sure the top and bottom rails are even at each end.

FIGURE 4

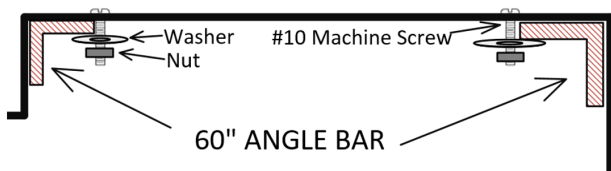

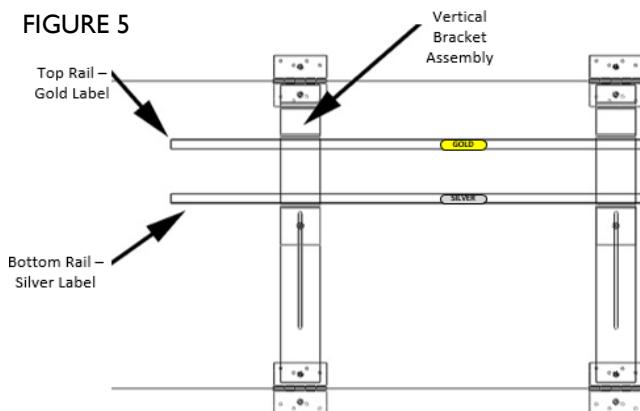

FIGURE 5

WARNING

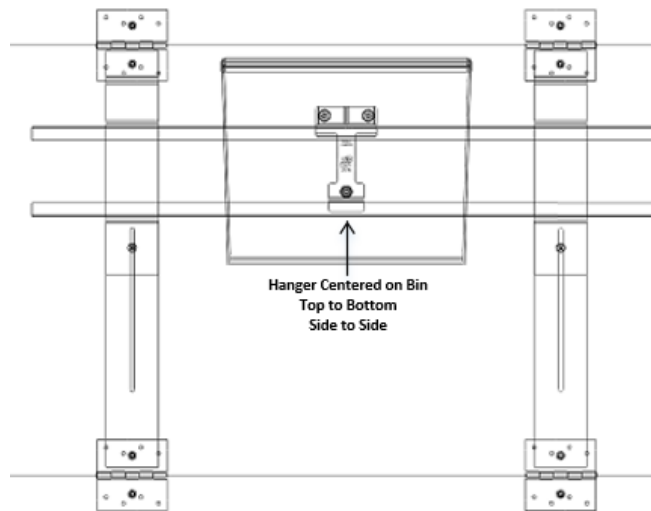

Wear safety glasses and use extreme care when using power tools.

CAUTION

- Make sure all fasteners are tightly secured at the end of each step unless instructed otherwise.

STEP 9. Center a Hanger (equal distance side to side and top to bottom) on a bin. See Figure 6.

FIGURE 6

STEP 10. Using your drill with a 1/4" bit, drill 3 holes in the bin to match the holds in the hanger.

TIP * To ensure the holes line up with the hanger, drill one hole at a time, insert the 1/4" machine screw with washer and tighten nut. Repeat for the next 2 holes.

STEP 11. Repeat Step 10 for the remaining hangers/bins.

WARNING

- Maximum load for the Universal Mounting Kit = 40 lbs or 18 kgs.
- Maximum load per Hanger = 10 lbs or 4.5 kgs

Make it Easy...that's our motto at GDStore

- Mounting storage bins on your garage door, wall, or ceiling...**GDStore Makes it Easy!**
- Transparent storage bins...**Make it Easy!!**
- Use the bins to create "Toolkits"...**Make it Easy!!!**

My favorite toolkit is car care. I have all the cleaning products, cloths and sponges in a see-through bin...*just grab it and go clean.* I even use the bin as a soap bucket.

My wife has a toolkit bin for gardening. Create your own handy toolkits for lawn car, ATV's, Snowmobiles, all the aerosol cans in your garage. **TOYS**...just grab the bin for your trip whenever the children are in the car. The list of terrific space saving ideas is limitless.

Don't be limited to storage containers!

Attach the hangers to your power tool carry cases. Storing those bulky cases on the ceiling of your garage is a great way to get organized and have more space. GDStore makes it easy!

Too many shoes on the floor of your walk-in closet...**put GDStore on the ceiling** and get all those seasonal items out of your way until you need them.

We can't wait to see all the clever ways our customers use the GDStore storage system.
