## A NEW CHOICE FOR MOBILITY IN THE HIGHLANDS

The Southern Highlands community is home to a new business offering full-service mobility equipment for medical recovery or ongoing daily living needs.

Established by third-generation Highlands resident and industry specialist Michelle Conway, the company is backed by family and local partners with decades of experience in home care, nursing, pharmaceutical and work health and safety.

“Working in the local area for the past 10 years, I recognised a strong demand for products to help people live comfortably in their homes. I set out to provide mobility equipment with a high level of personalised service but also in a discreet and respectful manner,” Ms Conway said.

The new business has already received a positive reaction with clients. “Being conveniently located within the Bowral street medical precinct, our clients love that they can visit the showroom and discuss their recovery needs. We provide very accessible contact hours 8am-8pm 7 days a week for sales and hire options,” she said.

The business also actively contributes to the community by directly supporting local charities and volunteer organisations through its community affiliates program.

Highlands Home Medical showroom is open Monday to Saturday at 47 Bowral Street (corner Walker Street), online at [HighlandsHM.com.au](http://HighlandsHM.com.au) or @HighlandsHM on social media. Phone inquiries are from 8am-8pm, seven days a week on 1300 641 448.
