

Freddy Ecovac

Leading the way in coolant recycling 

The Freddy Ecovac is unique in the Freddy coolant recycling family as it is the only vacuum to vacuum out and recycle the coolant continuously, using an independent pump for return.

The Freddy Ecovac is designed to vacuum out coolant from machine tool sumps, machine beds, drip trays, conveyors and even the shop floor with the dedicated floor tool and recycle it for re-use.

- The most widely used and well-established coolant vacuum range in the world
- Recycles coolant and extends coolant life
- Enhances coolant performance and production quality
- Significantly reduces coolant usage
- Improves and extends tool life
- Extensively cuts waste disposal costs
- Removes contaminants that cause bacterial growth
- Removes contaminants that cause micro-abrasions which can lead to dermatitis
- Complete with 24 months warranty

Specification

- 200 or 300 litres tank capacity
- Finished in oil and acid resistant powder coated paint
- 37 litres perforated steel basket
- Comes complete with full set of tools and hoses
- Filters available from 1 - 1,000µm

Freddy Ecovac Models

Capacity: 200 litres | Length: 1210mm | Width: 697mm | Height: 1350mm

Power unit	# of phases	Weight (empty)	Weight (full)	Airflow	Water flow in *	Water flow out
2kW 240v	1	115	315	2200	270	80

Capacity: 300 litres | Length: 1405mm | Width: 730mm | Height: 1350mm

Power unit	# of phases	Weight (empty)	Weight (full)	Airflow	Water flow in *	Water flow out
2kW 240v	1	135	435	2200	270	80

Weight in kilograms (kg)

* Water flow tested using a 51mm hose at the same level as the fluid being vacuumed.

If the machine is higher than the fluid, flow rates will be slower than the quoted values.
