

# Capture the true story and PROTECT YOURSELF WITH A DASH CAMERA

A dash cam is a small digital video camera that mounts to a car's dashboard or windshield. It then records the driver's journey whenever the car is on and moving. Think of it as a record of everything happening in your car. It is an essential tool for ensuring safety on the road for both driver and passenger.

Dash cams play an important role in insurance claims should you be in an accident, as it can indicate who was at fault. Your dash cam guards you against illegal activity happening in your car and provides an unbiased recording of any incident. Some higher-end models also show speed, direction, driver behaviour and more.

**For anyone who spends a fair amount of time travelling on the road, this is a must-own product.**

## FREQUENTLY ASKED QUESTIONS:

**How much footage can I record before my memory is full?**  
At Full HD settings, a 32GB SD card will hold about 4 hours of footage for each camera. Once full, the camera will automatically record over the oldest footage, unless it has been locked (either manually or by the camera's collision sensor). Battery life is not applicable as the camera runs off your cigarette lighter when the car is on.

**How does it charge?**  
Included with your purchase is a USB charging cable and 12V cigarette lighter adaptor which will charge the camera when plugged in and the engine is running.

**Do I need a computer or special software?**  
No. Your footage can be played back, deleted and everything in between using the built in screen and on-device controls.

### How is the dash camera mounted to the windshield?

The camera is mounted behind the rear-view mirror, using a mount similar to a GPS device. It can be removed when the vehicle is left unattended, to help prevent theft.

### How do you download the video footage?

Either access the SD card directly from the camera and use a 3rd party (micro) SDcard reader (not included) or connect the entire camera unit to a computer using the supplied USB cable.

### How does warranty work? Who do you contact?

This product is under warranty against manufacturer defects for a period of 18 months from date of purchase. For warranty queries, contact Action Gear on 011 781 1323 or [info@actiongear.co.za](mailto:info@actiongear.co.za)

### Is there a financing option (e.g. 3 / 6/ 12 months)?

At this time we do not offer any financing options.

## KEY FEATURES

- Front Camera Resolution: 1920x1080p at 30 FPS
- Cabin Camera: 1280x720p at 30 FPS
- 2.4 inch colour display
- JPG Photo Format
- AVI Video Format
- Manual file locking
- Motion detection
- Time stamp
- Night Vision
- G-sensor and GPS
- Manual file locking
- Auto segmented loop recording
- Micro-SD storage up to 64GB
- USB 2.0 Interface
- HDMI and HD digital output
- Built-in rechargeable Li-ion battery with power-off protection
- Working temperature of -5°C and 60°C
