

## HORNS

The Horns should be facing forward. The front of the horns are curved, and the back of the horns, that goes against the wall, is flat.

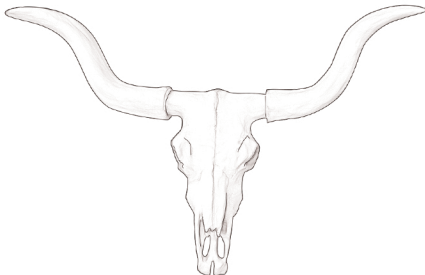

## HEAD

Lay the head down flat against a flat surface, the head should be facing up. By the holes on the top of the head, there may be an "R" and "L" on them that will correspond with the horns.

## INSERT HORNS

The horns may have an "R" and "L" on them that will correspond with the "R" and "L" in the head. Gently insert the antlers into the slots. They should go in relatively unforced. Optional After you confirm they are in properly, you may take them out and add a couple of drops of glue for permanent placement at the base of the antler.

## HAPPY DANCE

You did it! Your Faux Longhorn Skull is ready to be hung! After hanging and happy dancing, don't forget to send us a picture of your new wall!
