

Airplane Footrest

USER MANUAL

- 1 Remove the airplane footrest from the travel bag and unfold it.

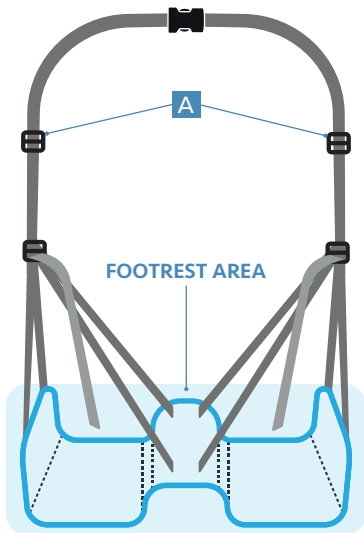

- 2 Put your tray table down. Pick up the straps with both hands and place straps over the metal support bars on the back of the tray table.

3

Adjusting the length:

Use clasps **A** to adjust the upper straps to set your desired height. The footrest area should hang at least 3 inches off the floor. Always adjust on both sides evenly.

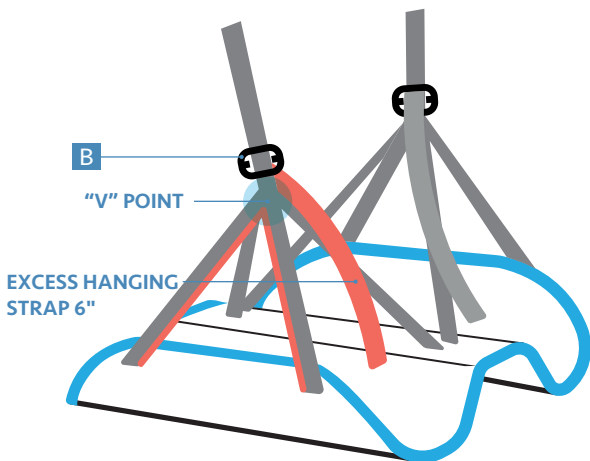

Adjusting the footrest area:

NOTE: The footrest area comes pre-adjusted and when hanging from the tray table it should be in the shape of a "W" like in the diagram above.

If it is not in the shape of a "W", proceed with these steps:

1. On each side, make sure the bottom clasps **B** are touching the "V" point where the side straps meet. The excess hanging straps should be about 6 inches in length.

2. The footrest area should not look like a “U” or a raised “W” shape, as demonstrated.

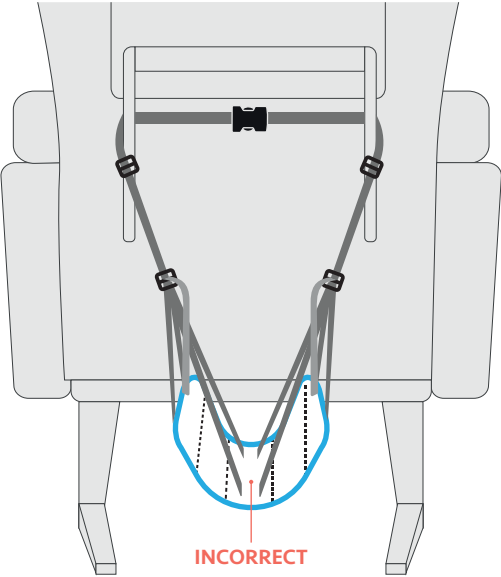

Fig 1. “U” Shape

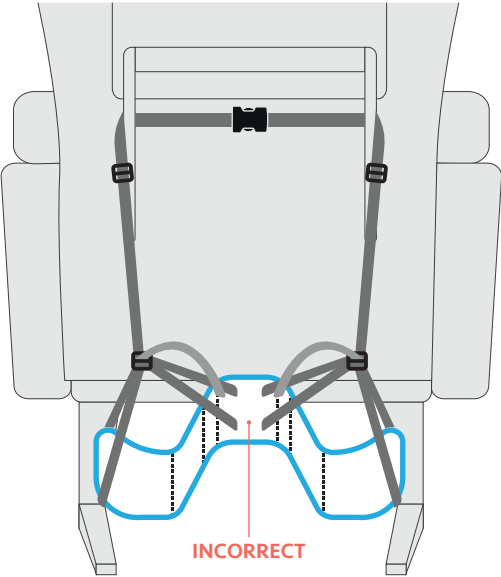

Fig 2. Raised “W” Shape

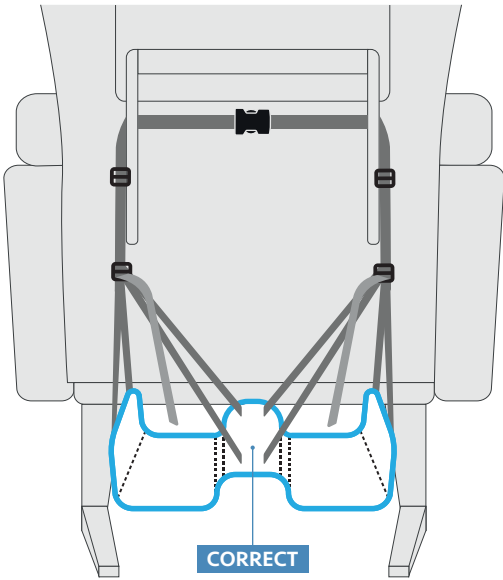

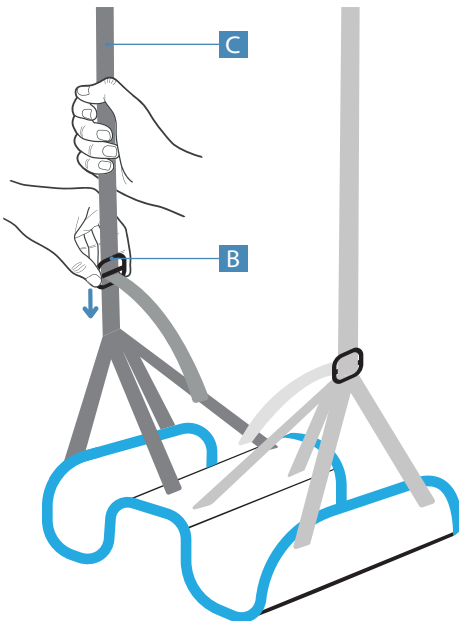

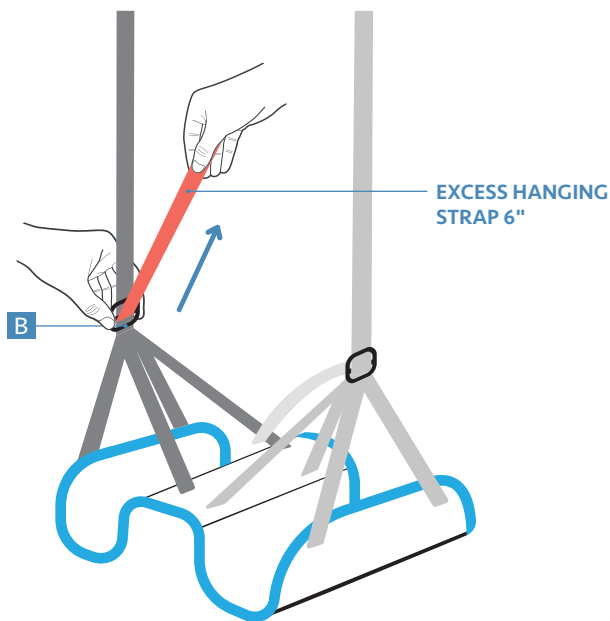

Fig 3. "W" Shape

To fix:

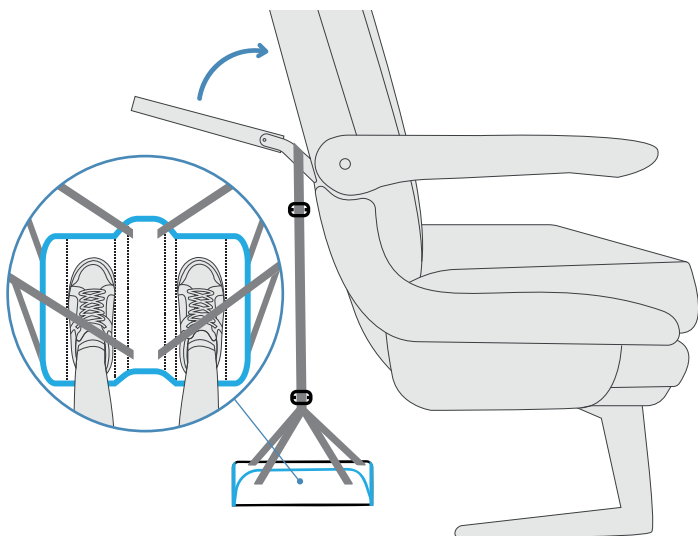

1. Set bottom clasp **B** all the way down to the "V" by holding the strap **C** with one hand and with the other hand slide the bottom clasp **B** down to the "V". Repeat on the other side.

2. Hold the bottom clasp **B** with one hand and pull the excess hanging strap up with the other hand. The excess hanging strap should be about 6" in length. Repeat on the other side.

4 Put your tray table up, place your feet in the footrest area, sit back and enjoy. The airplane footrest can be used with the tray table up or down.

HAVE AN ISSUE WITH YOUR AIRPLANE FOOTREST?

Enjoy hassle-free replacements: if your airplane footrest is defective or damaged, we will ship you a new one ABSOLUTELY FREE.
