Root Roids	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L				
Fruit Roids					1 Scoop / L				
Boost		2 Scoop / Plant							
	1	2	3	4	5	6	7	8	9
Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom
Root Roids	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L				
Fruit Roids	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L		
Boost	2 Scoop / Plant			1 Scoop / Plant					

### Fresh TurboDirt = First Use

If your growing period lasts longer than 10 weeks, we recommend switching to the No-Till growing method after the 10-week mark.

If your plant shows signs of nutrient deficiency, add 1/8 cup of either Go & Grow or Bud & Bloom, depending on the stage of your plant's growth.

**Go & Grow** - Go & Grow has been rigorously formulated and trailed to deliver explosive vegetative growth and to create a healthy environment for your roots and soil microbes! Utilizing 100% natural ingredients, Go & Grow will deliver the perfect balance of organic minerals, nutrients, and growth hormones for your plants!

**Bud & Bloom** - Bud & Bloom has been specifically formulated to deliver explosive floral displays with nutrient-dense fruit and flowers. Perfectly balanced with a mix of 100% organic ingredients, Bud & Bloom will provide your plants and soil with all-natural minerals, nutrients, and plant growth promoters!

**Root Roids** - Root Roids is a premium combination of Mycorrhizae & Nutrient Solubilizing Bacteria. Create massive colonies of Living Soil microorganisms directly in your root zone with our highly targeted Mycorrhizae & beneficial bacteria.

**Fruit Roids** - Provide your plants with a full spectrum of organic minerals, amino acids, growth hormones & enzymes, highly targeted towards flowering plants and unlocking their true growth potential. Increase yield's and oil production substantially whilst stimulating root growth and secondary branching (more bud sites) with the help of 100% organic and plant based growth hormones and minerals.

**Root Roids Boost** is a naturally derived blend of rhizobacteria (*Bacillus* sp.) that flourish in plant root zones, enhancing growth by optimizing the uptake of both macro and micronutrients. This product contains significant levels of amino acids and calcium, essential throughout all plant growth stages. Boost will enhance chlorophyll production, allowing plants to photosynthesize more efficiently.

### Root Roids Tips

When it comes to adjusting the pH of your solution, sequence matters. Always incorporate Root Roids after the pH adjustment. While hydroponic buffers, when used in proper ratios, won't harm beneficial microbes, adding pH buffering solutions after the Root Roids can compromise their efficacy. Ensure you get the best from Root Roids by following this order. The spoon provided with Root Roids & Fruit Roids gives growers a 5g dosage.

### Watering TurboDirt: A Key Reminder

Avoid watering your TurboDirt to the point of runoff. Overwatering can result in the loss of vital nutrients from the growing media, compromising the health and growth of your plants.

### EC Levels: Do They Matter?

Concerned about the EC of your runoff? Put those worries aside! In fact, there's no need to monitor it. Remember, you shouldn't be watering to the point of runoff.

For more on this, refer to the watering section above.

## Reusing No-till

Seedling / Clone	1	2	3	4					
Grow	Grow	Grow	Grow	Grow					
Root Roids	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L				
Fruit Roids					1 Scoop / L				
Boost		2 Scoop / Plant							
Go & Grow	1/8 Cup / 30L		1/8 Cup / 30L						
Bud & Bloom			1/8 Cup / 30L						
	1	2	3	4	5	6	7	8	9
	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom
Root Roids	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L					
Fruit Roids	1/2 Scoop / L	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L		
Boost	2 Scoop / Plant			1 Scoop / Plant					
Bud & Bloom		1/8 Cup / 30L			1/8 Cup / 30L				

**Reusing No-Till** = Reusing TurboDirt without removing the soil from the pot. Typically growers will leave the previous root ball intact when following this method.  
 If your growing period is longer than what's outlined in the guide, it's recommended to add an extra 1/8 cup of nutrients as needed by your plant.  
 If your plant shows signs of nutrient deficiency, add 1/8 cup of either Go & Grow or Bud & Bloom, depending on the stage of your plant's growth.

## Reusing Mixing Soil

Seedling / Clone	1	2	3	4					
Grow	Grow	Grow	Grow	Grow					
Root Roids	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L				
Fruit Roids					1 Scoop / L				
Boost		2 Scoop / Plant							
Go & Grow	1/4-1/2 Cup / 30L								
Bud & Bloom	1/4-1/2 Cup / 30L								
	1	2	3	4	5	6	7	8	9
	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom	Bloom
Root Roids	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L				
Fruit Roids	1/2 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L	1 Scoop / L		
Boost	2 Scoop / Plant			1 Scoop / Plant					
Bud & Bloom	Apply 1/4 Cup as required								

**Remixing Your Soil** = You can reuse TurboDirt by taking it out of the pot and rejuvenating it before planting again. Growers have the flexibility to decide how much of the old roots they want to leave in the soil.  
 If your plant shows signs of nutrient deficiency, add 1/8 cup of either Go & Grow or Bud & Bloom, depending on the stage of your plant's growth.
