

Bona Total Sanding Solutions

Bona Dust Containment System

Why Dust Containment?

Dust containment has become an expected service among consumers. They have become more aware of their dust-free sanding choice, and they realize they don't have to put up with the mess or health risks. That is why Bona has pioneered the most powerful, portable, and effective dust containment systems ever. The Bona Atomic® Dust Containment Systems are the necessary innovations to push your business forward, offering increased customer satisfaction, higher quality results, and healthier working conditions. Bona Atomic Dust Containment Systems are GREENGUARD Indoor Air Quality Certified®, and the Bona system is the only GREENGUARD certified hardwood floor system in the industry.

Bona's innovative dust containment systems provide:

- Increased customer satisfaction - virtually eliminates the nightmare of dust throughout the home
- Higher quality results - eliminates airborne dust that would settle back down into the finish
- Healthier working conditions - wood dust is a known carcinogen*
- Less time spent on site - no time-consuming prep work of hanging plastic or costly clean-ups

*10th Report on Carcinogens. U.S. Department of Health and Human Services, Wood Dust, 2002.

Bona Atomic Trailer - Mounted

The innovative concept of the trailer-mounted Bona Atomic Dust Containment System means having a more powerful system, providing evacuation of the airborne dust that is generated from the entire sanding process.

- Dramatically more powerful system, providing evacuation of airborne dust, which is powered by a fuel efficient, 29-HP electronic fuel injected water-cooled Kawasaki engine outside the home or business.
- 2" and 1/5" non-marking hose connects the sanding machines to the dust collection system in the trailer.
- Perfect system to advertise your business. Standard graphic packages included and other options available.
- GREENGUARD Certified

Bona Portable DCS®

- Bona exclusive two-step cyclonic intake system with a hospital-grade HEPA filter.
- Meets both EPA & OSHA requirements for LEED standards.
- Uses a Longopac® system (continuous bag) to collect the dust, never exposing the collected dust to the job site.
- Extremely portable and easy to use, weighing less than 100 pounds. Dolly system for easy load/unload.
- Clear dust barrel and filter gauge make it easy to know when unit is full.

Bona Belt HD

The combination of a large sanding drum, heavy duty upper travel roller and infinite drum pressure adjustments guarantees optimal sanding quality. Precise, powerful and effective finish and stock removal for the perfect wood floor.

Key Benefits:

- Large diameter sanding drum and travel roller keep better contact with sanding belt
- 2 speed pulley system allows for precision sanding on different wood species
- Infinite drum pressure for more precise sanding settings
- Smooth and stable for aggressive cutting and finesse sanding
- Compact for seeing over and around
- Excellent balance between front and back movement transitions
- Great for maneuvering in tight areas
- Integrated travel handle
- Powerful 3.7 kW motor

Bona Multidiscs

20" Multidisc

16" Multidisc

Innovative disc drive plate creates the perfect surface for a Bona Finish System. Available in a 20" multidisc that has 5-6" discs and a 16" multidisc that has 6-5" discs. Each disc spins independently of each other, all but eliminating swirls and scratch marks, leaving the floor smooth and flat. Can convert to most buffers for optimal dust collection.

Key Benefits:

- Perfect for patterned and dark stained floors
- Great for removing chatter marks
- Uses 5" Velcro backed abrasives
- Comes standard with six 1/4" Interface Pads for detailed, specie specific sanding on uneven surfaces

Sanding Options:

- Use without interface pad for all species with flat surfaces
- Use 1/4" pad for uneven surfaces or softer, more open grain species
- Use 1/2" pad for uneven surfaces on tighter, harder species (sold separately)

Bona FlexiSand Power Drive Buffer

The Bona® FlexiSand Power Drive™ is a powerful and flexible machine that can be equipped with many different drive plates for a wide variety of floor preparation. With its powerful 1.9 kW, 2.6 HP motor and sturdy construction, it runs smooth and stays cool even under a heavy load. The Bona Flexisand Power Drive provides powerful rotary sanding to bare wood and reduces the time needed to edge dramatically. The Bona Flexisand Power Drive delivers an amazingly fine and smooth sanding result and minimizes the risk of drum marks or chatter.

Key Benefits:

- Powerful, single phase motor
- Forced driven geared drive plate
- Four individually geared grinding pads
- Easy and ergonomic operation
- Large wheels for easy transportation
- DCS compatible for dust free sanding
- Multiple drive plate capability

“ The new Bona FlexiSand Power Drive is one of the most productive, labor-saving, and cost efficient hardwood floor sanding systems I have ever used! It saves a pass with the belt sander and edger and decreases orbital sanding by 75% on a job. In total it saves us an entire day of sanding per job. ”

- Gary Sword, Sword Floors

Established in 1919, Bona is a world leading innovator with a unique system for hardwood floor treatment. Through subsidiaries and distributors we have local presence in more than 50 different countries enabling us to be close to our customers and craftsmen.

Our long commitment and passion for hardwood floors enable us to offer lasting, sustainable results that meet all hardwood floor needs for professionals and floor owners alike.
