

Bona Dust Evacuation & Containment Systems

Why Dust Containment?

When thinking about refinishing your floors, dust-free sanding is the most logical choice. There's no need to put up with the mess or health risks of floor sanding without dust containment when Bona has pioneered the most powerful, portable, and effective dust containment systems ever.

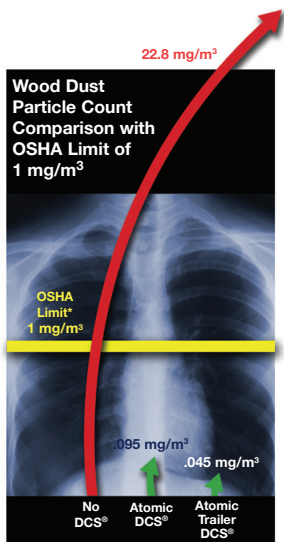

The Bona Atomic® Dust Containment Systems will increase your satisfaction by providing higher quality results and healthier conditions in your home. Bona Atomic Dust Containment Systems are GREENGUARD Indoor Air Quality Certified®, and the Bona system is the only GREENGUARD Certified hardwood floor system in the industry.

Without Dust Containment

With Dust Containment

Why the Concern for Indoor Air Quality?

Indoor air quality is a top priority for environmental groups, consumers, and manufacturers. The Environmental Protection Agency considers indoor air quality one of the top five environmental threats to human health.* Immediate effects of poor indoor air quality include irritation of the eyes, nose and throat, headaches, dizziness, allergies and fatigue. Indoor air pollutants may also trigger symptoms of some diseases, including asthma, reproductive and developmental problems, and cancer.

Bona Dust Evacuation & Containment Systems

The innovative concept of the van-mounted or trailer-mounted Bona Atomic Dust Evacuation System means having a more powerful system while providing evacuation of the airborne dust that is generated from the entire sanding process.

Bona Atomic Van

Bona Portable DCS® 2.0

Bona Atomic Trailer - Mounted

Bona DCS® Super Vac

Bona Dust Containment Systems can also include the Bona Atomic 110, Bona Atomic 300, Bona Atomic 600, and Bona Portable DCS.
