Adjustable cup holder	Y (2 positions)
Programmable coffee quantity	Y
Steam function for cappuccino	Y
Hot water function	Y
Water tank capacity	1 liter

Two of the most celebrated Italian espresso brands, Gaggia and illy, have teamed up to introduce a single-serve machine, that consistently delivers authentic beverages using the famous illy iPerEspresso capsules.

Engraved with an illy flower design, the front panel has a unique cup holder and drip tray that can be positioned two different ways; it can be lowered to accommodate tall glasses or raised to fit smaller cups.

The Gaggia for illy Plus has dedicated on/off, cup-volume, and steam controls. The programmable cup-volume button allows you to adjust the amount of espresso brewed, ensuring the perfect cup every time.

While many single-serve machines do not have steaming and frothing capabilities, the Gaggia for illy Plus has an integrated steam wand and hot water dispenser, making milk-based beverages and teas a breeze to prepare. The wand can swivel side to side, to allow for easy cup placement; it also has a no-burn grip for your safety.
